NOTE TO CONTRIBUTORS

Non-controversial articles on labour matters of topical interest (e.g. labour and wage policy; industrial relations; industrial management; trade union movement; labour welfare; workers' participation in management; employment/ unemployment; labour research of empirical value and general interest etc.) are accepted for publication in this Journal. The articles generally not exceeding ten thousand words may be sent in a C.D in Microsoft Word only with a print out in double space on one side foolscap paper, addressed to the Director General, Labour Bureau, 'Shram Bureau Bhawan', Block No.2, Institutional Area, Sector-38 West, Chandigarh-160036 along with a declaration by the author that the article has neither been published nor submitted for publication elsewhere. All references and footnotes, may be given only at the end of the articles.

Authors are solely responsible for the factual accuracy and the opinion expressed in their signed articles. The Labour Bureau, however, reserves the right to edit, amend and delete any portion of the article to make it more presentable and to reject any article, if not found suitable. The articles which are rejected will not be returned and no correspondence will be entertained on the articles which are rejected by the Editorial Committee.

A copy of the Journal, in which the article appears, is supplied to the author. An honorarium of up to Rs. 1,000 is also payable as per the rules for each article published.

Our address: The Director General,

संक्षेप में समाचार NEWS IN BRIEF

(अ) (a) भारतीय श्रम INDIAN LABOUR

The news items reported below have been gleaned from various official and unofficial sources. The Labour Bureau is not in a position to vouchsafe the authenticity of the unofficial news items.

India's unemployment rate declines to 1-year low in September- India's unemployment rate dropped to a one-year low in September as joblessness in rural areas fell despite weak monsoon rains. The overall joblessness rate slid to 7.09% last month from 8.10% in August data from private research firm Centre for Monitoring Indian Economy showed. That's the lowest reading since September last year. Rural unemployment dropped to 6.20% from 7.11% in August while urban unemployment rate fell to 8.94% from 10.09% in the same period. India recorded the weakest monsoon rains in five years with the June-September rainfall about 6% less than the long-term average. Still it did not impact much the agricultural activity in the country. Urban joblessness also saw a dip ahead of the key festival season in India. Employers usually gear up on hiring — especially in the gig and contract employment segment — ahead of Diwali. Creating enough jobs for the country's 1.4 billion people remains a key task for Prime Minister Narendra Modi's government ahead of 2024 elections. Last month he distributed 51000 appointment letters to new recruits as part of a special employment initiative amid discontent over rising joblessness.

(The Times of India 02.10.2023)

India's jobless rate at 6-year low; wage employment share shrinks- India's unemployment rate fell to a six-year low of 3.2 per cent in the July-June 2022-23 period down from 4.1 per cent in the same period the previous year according to the latest annual Periodic Labour Force Survey (PLFS) report. The report released by the National Statistical Office (NSO) showed a decline in unemployment rates in both rural and urban areas during the 2022-23 period to 2.4 per cent and 5.4 per cent respectively from 3.2 per cent and 6.3 per cent in the 2021-22 period. The unemployment rate for rural women (1.8 per cent) was lower than that for rural men (2.7 per cent) in 2022-23; in urban areas the rate was higher for females (7.5 per cent) compared to males (4.7 per cent). The unemployment rate for a one-year period under the so-called "usual status" for persons aged 15 years and above declined for the fifth consecutive year since the survey was launched in April 2017. Before the PLFS the National Sample Survey Organisation (now known as NSO) used to release data related to employment and unemployment based on household socioeconomic surveys once every five years. In the 2017-18 period the unemployment rate at the all-India level stood at 6 per cent. In usual status employment is determined based on a reference period of 365 days preceding the date of the survey as distinct from "employment status" which is determined based on a reference period of seven days known as the current weekly status (CWS) of the person. The latest survey also showed a significant increase in the Labour Force Participation Rate (LFPR) which represents the share of people either working or seeking work in the population to 57.9 per cent in the 2022-23 period from 55.2 per cent in the 2021-22 period at the national level. The rural LFPR stood at 60.8 per cent up significantly from 57.5 per cent in 2021-22 while its urban equivalent increased to 50.4 per cent from 49.7 per cent over the same period. But there has been a strain on the quality of employment as the share of people having regular or wage employment declined to 20.9 per cent in the 2022-23 period from 21.5 per cent in the previous year's period. On the other hand the share of people engaged in self-employment including unpaid household work or running a small business increased to 57.3 per cent in the period under review from 55.8 per cent a year ago. Santosh Mehrotra visiting professor at the University of Bath pointed out that contrary to popular belief labour markets are yet to recover as the share of wage employment is significantly and consistently lower than in the pre-pandemic period leading to an increase in self-employed individuals. In 2018-19 wage employment accounted for 23.8 per cent of total employment. "Wage employment is a sign of improving labour markets. However its decline in the past year and the corresponding increase in labour force participation rate shows that more and more people are joining the labour markets and the economy isn't able to generate enough decent jobs for them

which is leading them to engage in self-employment either as unpaid household help or running a small business. In a way the impact of reverse migration during the pandemic which saw the addition of nearly 50 million people to agriculture is yet to be overcome" he added.

(Business Standard 10.10.2023)

IMF raises India's FY24 GDP growth forecast to 6.3%: Report- India's economic growth forecast for the current fiscal year has been raised to 6.3% from 6.1% earlier the International Monetary Fund said in its October 2023 World Economic Outlook (WEO) report that was released. The global lender expects retail inflation in the South Asian nation to rise to 5.5% in 2023/24 before easing to 4.6% in 2024/25. "Growth in India is projected to remain strong at 6.3% in both 2023 and 2024 with an upward revision of 0.2 percentage points for 2023 reflecting stronger-than-expected consumption during April-June" the IMF said. The Reserve Bank of India has projected consumer price index (CPI)-based inflation for the current fiscal year at 5.4% while GDP growth is seen at 6.5%. Monetary policy projections are consistent with achieving the Indian central bank's inflation target over the medium term the IMF said. The country's current account deficit is expected to remain at 1.8% of GDP in FY24 and FY25 the IMF added. IMF cut its growth forecasts for China and the euro area and said overall global growth remained low and uneven despite what it called the "remarkable strength" of the U.S. economy. The IMF left its forecast for global real GDP growth in 2023 unchanged at 3.0% in its latest WEO but cut its 2024 forecast by 0.1 percentage point to 2.9% from its July forecast.

(The Times of India 10.10.2023)

Female labour force participation rate reaches 37% in 2023: Research- A recent report has revealed a significant leap in the Female Labour Force Participation Rate (FLFPR) in India. The Periodic Labour Force Survey Report 2022-23 released by the Ministry of Statistics and Programme Implementation on October 9 demonstrates a remarkable increase of 4.2 percentage points pushing the FLFPR to 37.0 per cent in 2023 read the Ministry of Women and Child Development press release. This growth reflects a positive shift in the country's labour force dynamics with more women participating actively in the workforce. This substantial increase in the FLFPR signifies a considerable stride towards women's empowerment and their active involvement in India's socio-economic and political development read the press release. The Government of India has taken decisive actions to promote women's engagement in the workforce focusing on their long-term well-being. This comprehensive approach encompasses various stages of women's lives including substantial initiatives targeting girls' education skill development entrepreneurship facilitation and ensuring safety in the workplace read the press release. Government policies and legislation in these domains have played a pivotal role in advancing the agenda of 'women-led development.' By promoting opportunities for women in education skills and entrepreneurship and by ensuring a safe and supportive working environment the government has laid the foundation for a more inclusive and gender-equal workforce read the release. The increase in FLFPR not only reflects women's growing participation in the labour force but also points towards a broader societal transformation where women are increasingly contributing to the nation's progress and their own empowerment. This achievement underscores the government's commitment to gender equality and women's rights making strides toward building a more equitable and prosperous society.

(Business Standard 13.10.2023)

EPFO adds 1.69 million net members in August 2023; majority aged 18-25- The Employees' Provident Fund Organisation (EPFO) added 1.69 million net members in August 2023 according to provisional payroll data released. Out of this around 926000 are new members who joined the EPFO in the month of August with 58.36 per cent of them belonging to the age group of 18-25 years. This is indicative of a significant influx of youth entering the organised sector workforce. The enrollment in August is slightly less than the previous month when the EPFO onboarded 1.87 million net members the highest number of enrollment recorded by the organisation in a month. In July 2023 members between the ages of 18-25 made up 58.45 per cent of new members. During August 3210 establishments extended social security cover to their employees by remitting their first Electronic Challan cum Return (ECR). Additionally approximately 1.18 million members exited and rejoined EPFO marking a 10.13 per cent increase year on year. These members opted to

transfer their accumulations instead of applying for final settlement thereby extending their social security protection. The data also revealed a continuous decline in members leaving EPFO in the last two months. Gender-wise analysis showed that out of 926000 new members 244000 were female and 682000 male. The report added that there was an addition of 343000 net female members during the month. Maharashtra Karnataka Tamil Nadu Haryana and Gujarat were the top five states in terms of net member addition. They enrolled 996000 out of the 1.69 million members accounting for 58.64 per cent of the net members added. When analyzing the industry-wise data pan India trading-commercial establishments building & construction engineer-engineering contractors and textiles sectors had the highest membership. Expert services including manpower suppliers normal contractors security services and miscellaneous activities contributed to around 39.87 per cent of the total net membership added.

(Business Standard 20.10.2023)

120000 job openings recorded in Aug Sep across key Indian cities: Report- There has been a significant surge in hiring demand ahead of the festive season as over 1.2 lakh job openings were recorded in August and September 2023 across key Indian cities as per a report by Apna.co a leading jobs and professional networking platform. According to the report there was a significant 61 per cent year-on-year increase in women applicants during July-September 2023. "The increase in women applicants indicates a growing demand for women professionals across industries as companies tend to experience heightened activity during the festive season especially in sectors like e-commerce retail and hospitality" the report said. The festive season saw active participation from leading companies like Bajaj Axis Bank Paytm Flipkart and Reliance which offered attractive incentives to secure top talent and boosted hiring for various roles like sales marketing finance HR and business development. According to apna.co the platform witnessed a substantial increase in employer engagement from July to September 2023 with 78000 new employers joining the platform a significant rise from 42000 in 2022. This growth was accompanied by a notable increase in job postings reaching 213000 compared to 170000 in the same period in 2022 it added. "We've observed a significant rise in women applicants and changing job seeker preferences over the past year" apna.co founder and CEO Nimit Parikh said. "Looking ahead we anticipate further transformations in the employment landscape as we continue to empower professionals and bridge the gap between job seekers and employers" he noted.

(Business Standard 30.10.2023)

Consumer Price Index Numbers for Industrial Workers (CPI-IW) on base 2016=100 and Agricultural and Rural Labourers on base 1986-87=100 for the month of September 2023

Consumer Price Index Numbers for Industrial Workers- The All-India CPI-IW for September 2023 decreased by 1.7 points and stood at 137.5 (one hundred thirty seven point five). On 1-month percentage change it decreased by 1.22 per cent with respect to previous month compared to increase of 0.84 per cent recorded between corresponding months a year ago. The maximum downward pressure in current index came from Food & Beverages group contributing 1.10 percentage points to the total change. At item level Fish Fresh Cotton Seed Oil Mustard Oil Apple Orange Bitter Gourd Brinjal Cabbage Carrot Chillies Green Ginger Lady's Finger Tomato Capsicum Gourd Radish Cooking Gas etc. are responsible for the fall in index. However this decrease was checked by Rice Wheat Wheat Atta Arhar Dal Chana Dal Dairy Milk Poultry/Chicken Eggs-hen Banana Grapes Cauliflower Garlic Onion Cumin Seed/Jira Cooked Meals Electricity Domestic Kerosene Oil Cigarettes Pan Masala School Uniform (Boys/Girls) Books School/ITI Tuition and other Fees-College and School/ITI etc. putting upward pressure on the index. At centre level Salem recorded a maximum decrease of 6.7 points followed by Udham Singh Nagar and Jalandhar with 5.8 and 5.4 points respectively. Among others 5 centres recorded decrease between 4 to 4.9 points 5 centres between 3 to 3.9 points 19 centres between 2 to 2.9 points 30 centres between 1 to 1.9 points and 13 centres between 0.1 to 0.9 points. On the contrary Jalpaiguri recorded a maximum increase of 1.9 points followed by Chikmagalur and Jammu & Kashmir with 1.2 and 1.1 points respectively. Among others 9 centres recorded increase between 0.1 to 0.9 points and 1 centre index remained stationary. Year-on-year inflation for the month stood at 4.72 per cent compared to 6.91 per cent for the previous month and 6.49 per cent during the corresponding month a year before. Similarly Food inflation stood at 6.52 per cent against 10.06 per cent of the previous month and 7.76 per cent during the corresponding month a year ago.

(Labour Bureau)

Consumer Price Index Numbers for Agricultural and Rural Labourers- The All-India Consumer Price Index Number for Agricultural Labourers and Rural Labourers (Base: 1986-87=100) for the month of September 2023 increased by 2 points and 3 points respectively to stand at 1226 (One thousand two hundred and twenty six) and 1237 (One thousand two hundred and thirty seven) points respectively. The major contribution towards the rise in general index of Agricultural Labourers and Rural Labourers came from food group to the extent of 1.13 and 0.88 points respectively mainly due to increase in prices of rice pulses turmeric whole onion sugar gur chilly dry garlic mixed spices etc. The rise/fall in index varied from State to State. In case of Agricultural Labourers it recorded an increase of 3 to 12 points in 15 States and a decrease of 2 to 12 points in 4 States while it remained stationary for 1 State (Rajasthan). Tamil Nadu with 1413 points topped the index table whereas Himachal Pradesh with 949 points stood at the bottom. In case of Rural Labourers it recorded an increase of 3 to 12 points in 14 States and a decrease of 3 to 12 points in 5 States while it remained stationary for 1 State (Rajasthan). Andhra Pradesh and Tamil Nadu with 1400 points each topped the index table whereas Himachal Pradesh with 1000 points stood at the bottom. Amongst states the maximum increase was experienced by Uttar Pradesh in the Consumer Price Index Numbers for Agricultural Labourers and Rural Labourers (12 points each) mainly due to rise in the prices of rice wheat atta pulses milk onion gur shirting cloth (cotton mill) etc. On the contrary the maximum decrease in the Consumer Price Index Numbers for Agricultural Labourers and Rural Labourers was experienced by Andhra Pradesh (12 points each) mainly due to fall in the prices of millets fish dry chillies green vegetables & fruits etc. Point to point rate of inflation based on the CPI-AL and CPI-RL stood at 6.70% and 6.55% in September 2023 compared to 7.37% and 7.12% respectively in August 2023 and 7.69% & 7.90% respectively during the corresponding month of the previous year. Similarly food inflation stood at 8.06% and 7.73% in September 2023 compared to 8.89% and 8.64% respectively in August 2023 and 7.47% & 7.52% respectively during the corresponding month of the previous year.

US job growth beats expectations in September; unemployment rate unchanged at 3.8% - U.S. job growth surged in September suggesting that the labor market remains strong enough for the Federal Reserve to raise interest rates this year though wage growth is moderating. Nonfarm payrolls increased by 336000 jobs last month the Labor Department said in its closely watched employment report. Data for August was revised higher to show 227000 jobs added instead of the previously reported 187000. Economists polled by Reuters had forecast payrolls rising by 170000 jobs. Estimates ranged from 90000-256000 jobs. The larger-than-expected increase was despite the tendency for the initial September payrolls print to be biased lower because of seasonal adjustment issues related to the return of education workers after the summer break. The economy needs to create roughly 100000 per month to keep up with growth in the working-age population. The labor market's resilience 18 months after the Federal Reserve started raising interest rates to cool demand suggests that monetary policy could remain tight for some time. Most economists do not believe that the U.S. central bank will hike rates again this year. Since March 2022 the Fed has raised its benchmark overnight interest rate by 525 basis points to the current 5.25%-5.50% range. There was no impact on payrolls from a strike by the United Auto Workers (UAW) at General Motors Ford Motor and Chrysler parent Stellantis. The strike by roughly 25700 of the 146000 UAW members started towards the end of week that the government surveyed businesses for September's employment report. There was no boost from the end of a months-long strike by Hollywood actors as they returned to work after the payrolls survey period. The unemployment rate was unchanged at an 18-month high of 3.8%. Monthly wage growth remained moderate with average hourly earnings rising 0.2% after a similar gain in August. In the 12 months through September wages increased 4.2% after advancing 4.3% in August. Wages are still rising faster than the 3.5% pace that economists say is consistent with the Fed's 2% inflation target. But as fewer people quit their jobs in search of greener pastures wage growth could moderate though recent hefty union contracts pose a risk. Labor market strength is helping to sustain the economy with growth estimates for the third quarter as high as a 4.9% annualized pace more than double what Fed officials regard as the non-inflationary rate of around 1.8%. But dark clouds are gathering over the economy amid soaring U.S. Treasury yields and political dysfunction in Washington. Millions of Americans resume student loan repayments this month which economists say will weigh on consumer spending impacting purchases of long-lasting manufactured goods houses as well as travel and entertainment with ripple effects on employment. Economists estimate that the expiration of the more than three-year moratorium could cut at least \$400 per month from budgets of households carrying student debt.

How to ensure decent work and job quality for essential workers- During the COVID-19 pandemic key workers – such as transport food system and health workers - kept our societies and economies afloat. Yet the considerable benefits which key workers generate are higher than the economic compensation and societal recognition they receive according to the ILO's World Employment and Social Outlook – The value of essential work. To highlight this issue Eurofound and the ILO jointly hosted an event. Both the ILO and Eurofound have found that key workers lack social justice and decent working conditions. They suffered a higher mortality rate than non-key workers during the pandemic and continue to face several deficiencies including long and irregular working hours an overreliance on temporary contracts as well as a lack of social protection such as paid sick leave. Key employees earn on average 26 percent less than other employees of which only 17 percent is accounted for by education and experience – the rest of which is unexplained. In a keynote address Nicolas Schmit EU Commissioner for Jobs and Social Rights underlined the pivotal role key workers play. "Without key workers our societies cannot function. Yet most key workers are paid at the level of the minimum wage or receive a low wage. There is also a lack of societal recognition for workers who provide essential goods and services. This is a fundamental contradiction in our societies" he said. Staff shortages have plagued many key occupations since the pandemic such as those of truck drivers and nurses. The demographic evolution in the EU will increase the demand for health and social care. The EU's working-age population is projected to decline after 2026 (by 57.4 million until 2100) whilst the population aged 65 and over will continue to

grow. "To address the labour market shortages in essential sectors in the EU we need to organize legal labour migration and the European Commission is working on this issue" he added. Addressing skills shortages will remain an issue. "We need to respond to the changes in our societies by promoting a mind-set of upskilling and reskilling and ensuring that essential workers are equipped with the right skills" the Commissioner said. Alcía Homs Ginel Vice-Chair of the Employment and Social Affairs Committee of the European Parliament pointed to the Resolution which the Parliament has adopted for the full implementation of the European Pillar of Social Rights in particular the principles related to fair wages and the right to collective bargaining. "The viability of the European social model is at stake" she said. A social partner panel composed of representatives from HOSPEEM EPSU EFCI and UNI Global Union indicated that the working conditions in several sectors including the care and cleaning sectors have not improved since the pandemic. The panel agreed that strong social dialogue and collective bargaining are necessary to ensure that key workers can negotiate better working conditions.

UK employers see pay growth slowing to 5% in 2024- British employers expect to give staff average pay rises of 5% during the 12 months to the end of September 2024 down from 6% over the past year a survey showed in a further sign that Britain's labour market is softening. "After a year of strong pay growth driven by a tight labour market signs of a cooling market are beginning to emerge influenced by a sustained period of higher interest rates" said Sheila Attwood senior content manager at XpertHR. The Bank of England is keeping a close eye on the outlook for pay as it considers whether its string of rate rises which began in December 2021 has now run its course. BoE Chief Economist Huw Pill said that he was concerned domestic pressures such as strong pay growth could cause inflation to level off above the BoE's 2% target even if inflation fell due to more stable energy prices. Before the pandemic when inflation was mostly near target average earnings typically grew at an annual rate of 3-4% and median pay settlements were usually slightly below that. XpertHR said the median pay award in the 12 months to the end of September was 6% up from 4% in the 12 months to September 2022 reflecting a sharp rise in inflation. The median pay award in the public sector was 6.1% the highest recorded since 1992 and just above the median 6.0% seen in the private sector. Official data due later is likely to show consumer prices rose 6.6% in the year to September 2023 according to a Reuters poll of economists down from a peak of 11.1% in October 2022. XpertHR said the median pay settlement in the three months to September was 5.4% up from 5% in the three months to August. The September data was based on 66 pay awards covering nearly 1 million employees while the year-ahead forecast was based on views from 201 organisations that represent nearly 600000 employees.

(Reuters 18.10.2023)

Women missing out on benefits of labour market growth in Asia and the Pacific- Considerable gender gaps between male and female workers remain in Asia-Pacific labour markets where women are not benefitting as much as men from employment opportunities in growing sectors offering higher pay and better conditions according to a new report. A joint report of the International Labour Organization and Asian Development Bank – Where women work in Asia and the Pacific: Implications for policies equity and inclusive growth – examines trends over the past three decades in sectoral employment of men and women in the Asia and the Pacific region and discusses what these mean in the broader context of gender equality inclusive growth and social justice. It highlights how the gap in labour market participation rates between men and women at close to 25 percentage points remains above the global level. This is largely due to the high and persistent gap of almost 50 percentage points in the South Asia subregion. Women continue to be concentrated in low value-added sectors such as agriculture and the retail trade – where decent work deficits are among the highest. The most dynamic sectors in the Asia and the Pacific region for job growth over the past three decades have almost all seen significantly more job gains for men than women. In the sector with the most dynamic growth – IT and other information services – only one in four jobs (25 per cent) went to women. Only in accommodations and food services activities did more than half of the job growth accrue to women. Speaking about the findings Chihoko Asada-Miyakawa ILO Assistant Director-General and Regional Director for Asia and the Pacific said

“Structural transformation has been an important element behind the economic growth records of Asia and the Pacific. But sadly this pattern of growth has clearly not benefitted women as much as men. Greater efforts are needed to address this inequality and reduce the barriers that are preventing women from accessing jobs with higher decent work returns while improving conditions in the sectors where women are working now.” The report highlights how significant differences exist in sectoral employment rates across Asia and the Pacific. The agriculture sector employs 30 per cent of women workers in the Asia-Pacific region but this figure rises to more than 57 per cent in the South Asia subregion – nearly three times the share in the East Asia subregion and more than ten times the share in the Pacific subregion. To address the inequalities a comprehensive approach is required that sees measures taken to foster gender equality within the broader labour market – to make sure that growth works for everyone – such as gender-responsive fiscal policies government spending and social protection measures. The report also calls for dedicated efforts to remove the barriers that different groups of women face in pursuing occupations in non-traditional higher-paying sectors and finally taking targeted action to improve working conditions in the sectors where women are concentrated in agriculture and retail for example.

श्रम निर्णय LABOUR DECISION

Petitioner should be given the ample opportunity for hearing before inflicting punishment.

In the High Court of Jharkhand at Ranchi W.P.(S). No. 5779 of 2013 Sandhya Mundu the petitioner contested an order issued by the State Information Commissioner Jharkhand Ranchi dated 26th August 2013. This order imposed a penalty of Rs. 25000 on the petitioner under the provisions of the Right to Information Act 2005 in response to an appeal filed by Sakil Akhtar the District General Secretary of Rashtriya Janta Dal.

The case stemmed from Sakil Akhtar's initial request for information which was allegedly not fulfilled by the petitioner who was then serving as the Block Development Officer in Sanha. The petitioner contended that she only became aware of the appeal and subsequent proceedings when she received the order from the State Information Commission sent by the Legal Cell of the Deputy Commissioner Lohardaga.

The petitioner argued that she had recently assumed her role and was not familiar with the ongoing appeal process. She claimed that her predecessor had filed a response stating personal difficulties in appearing before the Information Commissioner which she only discovered upon examining the case file after receiving the order.

Furthermore the petitioner's counsel argued that the order imposing the penalty was unlawful as it contravened Section 20 of the Right to Information Act which mandates that the concerned officer be given a reasonable opportunity to be heard before any penalty is imposed. They contended that the petitioner was not afforded this opportunity thereby violating principles of natural justice.

In contrast the respondents represented by their counsel defended the penalty asserting that the petitioner had persistently failed to provide the requested information despite multiple directives from the Information Commissioner.

After hearing arguments from both sides and examining the evidence presented the court sided with the petitioner. It emphasized that the petitioner had not been given a fair opportunity to defend herself before the penalty was imposed which was a violation of fundamental principles of natural justice.

In its ruling the court quashed the impugned order dated 26th August 2013 thereby nullifying the penalty imposed on the petitioner. It directed any amount recovered as penalty to be refunded to the petitioner and ordered the cessation of any ongoing proceedings against her.

Notes

1. Prices and Price Indices

1.1. Consumer Price Index Numbers for Industrial Workers

A.1.1.1. Labour Bureau's Series of All India Consumer Price Index Numbers for Industrial Workers (Base: 2016=100) – The All-India Consumer Price Index Numbers for Industrial Workers on Base: 2016=100 (General and Group-wise) along with Linking Factors with previous base: 2001=100 are presented in Table A.1.1.1. The All India Index is a weighted average of 88 constituent centre Indices compiled by the Labour Bureau. The current series of the Index Numbers has been introduced with effect from September, 2020 index replacing the series on base: 2001=100. The All India General Index as well as Group Indices for previous series on base: 2001=100 can be obtained by multiplying the current series indices by the respective Linking Factors. A note on the scope and methods of construction of these index numbers was published in December 2020 issue of the "Indian Labour Journal". The All India Consumer Price Index Number for the month of September, 2023 decreased by 1.7 points with respect to previous month and stood at 137.5 points.

A.1.1.2. Labour Bureau's Series of Consumer Price Index Numbers for Industrial Workers in respect of 88 constituent centres on Base: 2016=100 – The Consumer Price Index Numbers for industrial workers on Base: 2016=100 for 88 centres compiled by the Labour Bureau are presented group wise in Table A.1.1.2 for the months of August, 2023 and September, 2023. The Index Numbers measure the extent to which the overall levels of retail prices of goods and services consumed by Industrial Workers has changed when compared with the base period viz., 2016=100. As compared to previous month, the magnitude of rise/fall in the General Index varies from centre to centre. During September, 2023, Salem recorded a maximum decrease of 6.7 points followed by Udham Singh Nagar and Jalandhar with 5.8 and 5.4 points respectively. Among others, 5 centres recorded decrease between 4 to 4.9 points, 5 centres between 3 to 3.9 points, 19 centres between 2 to 2.9 points, 30 centres between 1 to 1.9 points and 13 centres between 0.1 to 0.9 points. On the contrary, Jalpaiguri recorded a maximum increase of 1.9 points followed by Chikmagalur and Jammu & Kashmir with 1.2 and 1.1 points respectively. Among others, 9 centres recorded increase between 0.1 to 0.9 points and 1 centre index remained stationary.

1.2. Consumer Price Index Numbers for Agricultural and Rural Labourers:

A.1.2.1 (a) and (b). Labour Bureau's Series of Consumer Price Index Numbers for Agricultural and Rural Labourers on Base: 1986-87=100 - All-India Consumer Price Index Numbers for Agricultural and Rural Labourers on Base: 1986-87=100 replacing the earlier series on base 1960-61=100 were released with effect from November, 1995. The all-India index is a weighted average of 20 constituent State indices compiled by the Labour Bureau for Agricultural and Rural Labourers separately. A detailed note on the scope and method of construction of these indices was published in February, 1996 issue of the Indian Labour Journal.

The Consumer Price Index Numbers (Base: 1986-87=100) for Agricultural and Rural Labourers for 20 States and All-India are presented group-wise in Tables A.1.2.1 (a) and (b) for the months of August, 2023 and September, 2023. These index numbers measure the extent of change in the retail prices of goods and services consumed by Agricultural and Rural Labourers as compared with the base period viz., 1986-87. The All-India Consumer Price Index Number for Agricultural Labourers and Rural Labourers (Base: 1986-87=100) for the month of September, 2023 increased by 2 & 3 points respectively to stand at 1226 (One thousand two hundred and twenty six) and 1237 (One thousand two hundred and thirty seven) points respectively.

A.1.2.2 (a) and (b). Monthly Consumer Prices of Selected Articles for Agricultural and Rural Labourers – The monthly consumer prices of selected articles of index basket of agricultural and

rural labourers utilized in the compilation of Consumer Price Index Numbers (Base: 1986-87=100) for 20 States separately for Agricultural and Rural Labourers for the month of September, 2023 are given in Tables A.1.2.2. (a) and (b). Though the spatial coverage and the individual sample village price quotations in both the series relating to the Agricultural and Rural Labourers are the same, the weighted prices of items at the State level will be slightly different from each other due to difference in the regional weights in each of the series.

2. Wages and Earnings

A.2.1 (a) and (b). Average Daily Wage Rates for Agricultural and Non-agricultural occupations- In pursuance of the recommendations of the Technical Working Group on rural retail prices set up by the NSO in 1974, Labour Bureau has been compiling and maintaining average daily wage rate data in respect of agricultural and non-agricultural occupations based on the data collected by the Field Operation Division of National Statistical Office (NSO) from a fixed set of 600 sample villages spread over 66 NSS regions in 20 states. Though these wage rate data have been collected since 1986-87, their regular compilation and dissemination started w.e.f December, 1998. The average daily wage rate data was collected for eleven agricultural and seven non-agricultural occupations till October, 2013. However, following the recommendations of the Working Group constituted by the CSO on advice of the National Statistical Commission (NSC), wage rate data is now being collected for 25 occupations (12 agricultural and 13 non-agricultural). The daily wage rate data received from the field are first normalized for eight working hours a day. The simple arithmetic average of these normalized daily wage rates is worked out for each of the 20 states. The average wage rates at all-India level are derived by dividing the sum total of wages of all the 20 states by the number of quotations. These averages are restricted only to those occupations where the number of quotations are five or more in order to avoid the apparent inconsistency in wages paid to different categories of workers on account of differences in number of quotations. The month-wise average daily wage rates are thus worked out at State level and also at all-India level are released regularly to the users through various sources. State-wise and all-India average daily wage rates by occupation and sex for the month of September, 2023 have been presented in Table A.2.1 (a) for agricultural occupations and Table A.2.1 (b) for non-agricultural occupations.

3. Industrial Dispute

A.3.1. Sector / Sphere-wise Number of Disputes, Workers Involved and Mandays Lost due to Industrial Disputes from January to September, 2023 – These statistics are received in the Bureau from the State Labour Departments and Regional Labour Commissioners (Central) in the prescribed format in the shape of monthly voluntary returns covering State and Central Spheres separately. Information on Strikes and Lockouts is collected by the concerned authorities and sent to the Bureau every month. Consolidated information for the year 2023 (as on 31st October, 2023) is presented in Table A.3.1.

A.3.2. Industrial Disputes (All Strikes and Lockouts) during January to September, 2023 - State-wise scenario of Industrial Disputes from January to September, 2023 is presented in Table A.3.2.

NOTES - 1. Labour Bureau takes every care to ensure correctness of the information presented in Sections A and B of the Journal. However, any error, if noticed, may kindly be brought to the notice of the Labour Bureau.

2. The indices given in Sections A and B measure the relative change in Consumer Prices over time at each Centre and as such these cannot be used for comparison of costliness among the different Centres.

टिप्पणी Note:- कीमतें दिये गए राज्य के प्रतिदर्श गांवों में चयनित दुकानों से लिए गए व्यक्तिगत उद्धरणों पर आधारित औसत कीमतें हैं तथा ये विनिर्देशन भिन्नता के कारण आपस में सही रूप से तुलनीय नहीं हैं। इसके अतिरिक्त कृषि श्रमिकों के लिए उपभोक्ता मूल्य सूचकांक के संकलन में उपयोग की गई सभी मदों की कीमतों का प्रकाशन संसाधनों की कमी के कारण नहीं किया जा रहा है / The prices are average prices based on individual quotations obtained from the selected outlets of the sample villages of a given State and are not comparable with each other due to their varying specifications. Besides, the prices of all the items utilised in compilation of C.P.I. Numbers for Agricultural Labourers are not being published due to resource constraints.

टिप्पणी Note:- कीमतें दिये गए राज्य के प्रतिदर्श गांवों में चयनित दुकानों से लिए गए व्यक्तिगत उद्धरणों पर आधारित औसत कीमतें हैं तथा ये विनिर्देशन भिन्नता के कारण आपस में सही रूप से तुलनीय नहीं हैं । इसके अतिरिक्त ग्रामीण श्रमिकों के लिए उपभोक्ता मूल्य सूचकांक के संकलन में उपयोग की गई सभी मदों की कीमतों का प्रकाशन संसाधनों की कमी के कारण नहीं किया जा रहा है / The prices are average prices based on individual quotations obtained from the selected outlets of the sample villages of a given State and are not comparable with each other due to their varying specifications. Besides, the prices of all the items utilised in compilation of C.P.I. Numbers for Rural Labourers are not being published due to resource constraints.

खंड ब SECTION B

क्रमिक सांख्यिकी SERIAL STATISTICS

Notes

1. Prices and Price Indices

1.1 Industrial Workers' Consumer Price Index

B.1.1.1 All-India Consumer Price Index Numbers for Industrial Workers – The All India Consumer Price Index Numbers (General and Food) on base 2016=100 are being published since their first release with effect from September, 2020 index replacing the old series on base: 2001=100. The indices for the old base (2001=100) series can be derived by multiplying the 2016 series indices by the Linking Factors, which are 2.88 for the General index and 3.00 for the Food index. Similarly, the indices for 1982 series can be derived by multiplying the 2001 series indices by the Linking factors, which are 4.63 and 4.58 for General and Food group respectively. Further, the indices for the old base (1960=100) series can be derived by multiplying the 1982 series indices by the Linking Factors, which are 4.93 for the General index and 4.98 for the Food index. The Annual Average (Calendar year 2006 to 2022 as well as financial year 2006-07 to 2022-23) and monthly All India Index Numbers (General & Food) alongwith twelve month moving average from September, 2022 to September, 2023 have been presented in Table B.1.1.1.

B.1.1.2 Labour Bureau's Series of Consumer Price Index Numbers for Industrial Workers – Serial statistics in respect of Consumer Price Index Numbers for Industrial Workers on base 2001=100 and new series on base 2016=100 (General Index only) for 88 centres are set out in Table B.1.1.2.

1.2 Consumer Price Index Numbers for Agricultural Labourers

B.1.2.1 (a) and (b) All-India Consumer Price Index Numbers for Agricultural and Rural Labourers (Base: 1986-87=100) – Serial statistics relating to the All-India Consumer Price Index Numbers (General and Food) for Agricultural and Rural Labourers on base 1986-87=100 separately for Agricultural Years 1995-96 to 2022-23, Financial Years 1995-96 to 2022-23 and Calendar Years 1995 to 2022 along with month-wise indices and 12-month moving averages for September, 2022 to September, 2023 are presented in Tables B.1.2.1 (a) and (b) respectively.

B.1.2.2 (a) and (b) Labour Bureau's Series of Consumer Price Index Numbers for Agricultural Labourers and Rural Labourers on Base: 1986-87=100 – Serial statistics in respect of Consumer Price Index Numbers (General Index) for Agricultural Labourers and Rural Labourers (Base: 1986-87=100) for 20 States are given in Tables B.1.2.2 (a) and (b) respectively.

1.3 Consumer Price Index for Rural, Urban and Combined

B.1.3 All india Consumer Price Index for Rural, Urban and Combined - The Consumer Price Index (CPI) for Rural (R), Urban (U) and Combined (C) are compiled and published by the National Statistical Office, Ministry of Statistics and Program Implementation, Govt. of India. The current series of CPI-R, CPI-U and CPI-C on base 2012=100 was released w.e.f. January, 2015 replacing the earlier series on base 2010=100. The All-India Consumer Price Index for Rural, Urban and Combined for the years 2011 to 2022 (Annual Averages) and for September, 2022 to September, 2023 (Monthly Figures) have been presented in Table B.1.3.

1.4 Wholesale Price Index

B.1.4 *All India Index Numbers of Wholesale prices* – The current series of Index Numbers of Wholesale Prices in India on base 2011-12=100 was released w.e.f. April, 2017 by replacing the earlier series on base 2004-05=100. These Index Numbers are compiled and published by the Office of the Economic Adviser, Ministry of Commerce & Industry, and Govt. of India. The indices for the period 2010 to 2022 (Annual Averages) and for September, 2022 to September, 2023 (Monthly Figures) are set out in Table B.1.4. These index numbers are published here to serve as supplementary information to the users of Consumer Price Index Numbers.

2. Wages and Earnings

B.2.1 *Earnings (Basic Wage and Dearness Allowance) of the Lowest-paid Workers/Operatives in Cotton Textile Mills* – The information concerning earnings of cotton producing Centres/States received from the State Governments, Employers' Associations and Individual Units is presented in Table B.2.1. The earnings of workers include minimum basic wage and dearness Allowance by whatever name called. The dearness allowance is linked to the Working Class Consumer Price Index Numbers of different Centres and varies from month to month according to the variation in the index.

3. Industrial Disputes

B.3.1 *Industrial Disputes (All Strikes and Lockouts)* – Industrial Disputes Statistics for the Years 2013 to 2023 are presented in Table B.3.1.

#- No Linking Factor as these centres were not covered in the earlier series.

* Rounded up from second decimal place.

Linking Factor – Figures on previous base (General Index) can be obtained by multiplying the index numbers of new base by the respective linking factors given against each centre and rounding off the result to the nearest whole number.

1.2 कृषि एवं ग्रामीण श्रमिकों के लिए उपभोक्ता मूल्य सूचकांक Consumer Price Index Numbers for Agricultural and Rural Labourers

तालिका ब.1.2.1 (अ) - कृषि श्रमिकों के लिए वर्ष-वार अखिल भारतीय औसत उपभोक्ता मूल्य सूचकांक (सामान्य एवं खाद्य आधार: 1986-87 = 100)

Note: -(i) Agricultural Year (July to June). (ii) Financial Year (April to March). (iii) New series of Consumer Price Index Numbers for Agricultural Labourers on Base: 1986-87=100 released w.e.f. November, 1995. To obtain indices on Base: 1960-61=100, the index figures need to be multiplied by the linking factor as below:-

General Index - 5.89 Food Index - 6.38

@ = औसत केवल 8 महीनों अर्थात् नव., 95 से जून, 96 तक पर आधारित/Average based on 8 months i.e. Nov., 95 to June, 96 only.

^ = औसत केवल 5 महीनों अर्थात् नव., 95 से मार्च, 96 तक पर आधारित/Average based on 5 months i.e. Nov., 95 to March, 96 only

\$ = औसत केवल 2 महीनों अर्थात् नव., 95 से दिस., 95 तक पर आधारित/Average based on 2 months i.e. Nov., 95 and Dec., 95 only.

तालिका ब.1.2.1 (ब) - ग्रामीण श्रमिकों के लिए वर्ष-वार अखिल भारतीय औसत उपभोक्ता मूल्य सूचकांक (सामान्य एवं खाद्य आधार: 1986-87 = 100)

.. = उपलब्ध नहीं है / Not available

A man is but the product of his thoughts. What he thinks, he becomes.
Mahatma Gandhi

All power is within you; you can do anything and everything. Believe in that, do not believe that you are weak; do not believe that you are half-crazy lunatics, as most of us do nowadays. You can do anything and everything, without even the guidance of anyone. Stand up and express the divinity within you.

Swami Vivekananda

Latest publications of the Labour Bureau
