NOTE TO CONTRIBUTORS

Non-controversial articles on labour matters of topical interest (e.g. labour and wage policy; industrial relations; industrial management; trade union movement; labour welfare; workers' participation in management; employment/ unemployment; labour research of empirical value and general interest etc.) are accepted for publication in this Journal. The articles generally not exceeding ten thousand words may be sent in a C.D in Microsoft Word only with a print out in double space on one side foolscap paper, addressed to the Director General, Labour Bureau, 'Shram Bureau Bhawan', Block No.2, Institutional Area, Sector-38 West, Chandigarh-160036 along with a declaration by the author that the article has neither been published nor submitted for publication elsewhere. All references and footnotes, may be given only at the end of the articles.

Authors are solely responsible for the factual accuracy and the opinion expressed in their signed articles. The Labour Bureau, however, reserves the right to edit, amend and delete any portion of the article to make it more presentable and to reject any article, if not found suitable. The articles which are rejected will not be returned and no correspondence will be entertained on the articles which are rejected by the Editorial Committee.

A copy of the Journal, in which the article appears, is supplied to the author. An honorarium of up to Rs. 1,000 is also payable as per the rules for each article published.

संक्षेप में समाचार NEWS IN BRIEF

(अ) (a) भारतीय श्रम INDIAN LABOUR

The news items reported below have been gleaned from various official and unofficial sources. The Labour Bureau is not in a position to vouchsafe the authenticity of the unofficial news items.

India's Unemployment Rate Falls in July Due to Farm Demand - India's overall unemployment rate fell in July as rural areas saw increased demand for agriculture labor with the onset of monsoon rains. The total joblessness rate fell to 7.95% in July, from 8.45% in June, according to data released by private forecaster Centre for Monitoring Indian Economy. Rural unemployment rate fell to 7.89%, from 8.73% in June, while urban unemployment rate ticked up to 8.06% from 7.87% in the same period. After a slow start, monsoon rains that water nearly half of the nation's farmlands have picked up pace, potentially bolstering the outlook for agriculture production and economic growth. Rains have been 4% above normal so far this season. Rural joblessness rate typically falls in July due to increased demand for laborers for farming work. Unemployment rate ticks up again in August after the sowing is done, past data showed. While the agriculture sector saw activity with improved rains, demand for labor from rural non-agriculture sector dropped in July, said Mahesh Vyas, managing director of CMIE. "This led to a fall in rural labor seeking employment, which in turn led to a fall in the rural employment rate." The labor force in rural India fell by five million, the data showed. Labor force participation rate in urban areas also fell, indicating broader weakness in the economy. Creating enough jobs for Indians is crucial for Prime Minister Narendra Modi as he seeks a rare third term in office in the national polls next year. His administration is distributing appointment letters as part of a promise to provide one million government jobs by the end of this year amid wide discontent over rising unemployment.

(Bloomberg, 02.08.2023)

Indian startup workers get average salary hike of 8 to 12% in 2022-23: Report - Indian startup employees received an average salary increment of 8 to 12 per cent in 2022-2023, with the variation attributable to individual and company performance, the quality and level of talent, and location, a new report showed. According to the venture capital firm Elevation Capital, the performance of employees continued to hold 50 per cent of the weightage on salary increments while taking on additional responsibilities and receiving a promotion factored in about 20 per cent. "The shift in the market situation has led to a correction in salaries, though largely at the leadership level. Interestingly, on the other hand, job seekers are willing to wait longer for the right job opportunity than settle for less-than-ideal pay," said Dipesh Jain, AVP - Talent, Elevation Capital. Moreover, the report said that the companies delayed salary increments or provided new stock grants instead of cash increments for leadership roles. For leadership roles, such as CXOs and function heads, exploring stock-based increments may be more appropriate while also planning to reassess the cash component in a few quarters. Bengaluru and Hyderabad emerged as top cities for tech talent availability with a combined share of 72 per cent but raised factors such as attrition, hiring cost and skill level as necessary considerations for startups. Some of the critical roles filled among the first few hires at early-stage companies are Chief of Staff/Founders' Office, Growth, and Finance, the report mentioned. "In the face of macro challenges, Indian startups are showcasing adaptability by offering inflation-led salary increments to attract and retain talent. However, the variation is significant, with technology professionals in small to mid-size startups seeing moderate increments," said Kallan H., VP - Talent, Elevation Capital. According to the report, there is a high demand for tech talent with moderate to strong prior functional expertise and adequate experience working on complex problems, as well as experience working across startups and MNCs.

(The Times of India, 11.08.2023)

76% of Indian workers feel stress has negative impact on performance: Report- 76% of Indian workers feel that stress has a negative impact on their performance at the workplace as mental health issues continue to haunt the employees, a report revealed. According to a report by ADP Research Institute, 49% of employees mention that stress impacts their mental health. Meanwhile, 65% of global workers feel the same. The report 'People at Work 2023: A Global Workforce View' explores employees' attitudes towards the current world of work, examines their expectations, and hopes for the workplace of the future. Meanwhile, there is a global decline from 70% in 2022 to 64% in 2023 in the percentage of workers who say they feel supported by their managers when it comes to mental health at work. Similar changes have occurred in India, where the percentage fell from 80% to 71% in the same time frame. Further, almost 6 in 10 Indian employees believe that their managers lack the skills required to engage in dialogues on mental health. "Numerous employers showed tremendous support for mental health and stress during the pandemic, but it is crucial for them to continue their vigilance. Workers still face significant levels of strain", Rahul Goyal, MD, ADP said. Talking about the importance of an empathetic workplace environment, he said: "A compassionate workplace culture holds immense value for both employers and employees. When individuals feel safe and supported, they are significantly more likely to perform better in their roles, require fewer sick leaves, and develop a positive outlook toward the company they work for." "Implementing measures like employee assistance programs and wellbeing initiatives can indicate that employers are rationalizing and formalizing their wellbeing support initiatives, potentially even outsourcing them, which can be beneficial," he added.

(The Times of India, 17.08.2023)

India slotted low on women empowerment, gender parity- India, despite figuring in the medium human development group of countries as per the Human Development Index, finds itself placed in the group of countries classified as low on empowerment on the first twin indices for women empowerment (WEI) and global gender parity (GGPI) brought out by UN bodies – UN Women and UNDP. A staggering 3.1 billion women and girls - over 90% of the world's female population - live in countries characterised by low or middle women's empowerment and low or middle performance in achieving gender parity. None of the 114 countries analysed have achieved full women's empowerment or complete gender parity. While India fares well on financial inclusion with a large section of women having their own bank accounts and the country leading the way in participation in local self government, the report highlights that there are still large gaps in skill building, presence of women in the labour market, political participation and representation in the private sector. That higher human development does not automatically translate into women's empowerment and gender equality, comes through in the report "The Paths To Equal" that for the first time assesses 114 countries on twin indices for women empowerment and gender parity in 2022. The UN bodies assert that together, these indices provide a more complete picture of countries' progress towards women's empowerment and gender equality. "Less than 1% of women and girls live in a country with high women's empowerment and a small gender gap. Globally, women are empowered to achieve, on average, only 60% of their full potential, as measured by the WEI, and women achieve 28% less than men across key human development dimensions, as measured by the GGPI," it is stated. The empowerment deficit according to the WEI in India is 48%, and gender gap according to the GGPI is 44%. India's score in WEI is higher than the regional average of central and southern Asia where the empowerment deficit is 50%. However, the gender gap in India at 44% is slightly higher than the central and southern Asia regional gender gap of 42%. In India, women, and girls fare well in certain empowerment indicators. For instance, 77.5% of women in their reproductive age have their need for family planning satisfied with modern methods. Furthermore, the country's adolescent birth rate of 16.3 per 1,000 women aged 15-19 is much lower than the regional average of 27.8. Additionally, India performs better than the regional average in financial inclusion, with 77.6% of women and girls aged 15 and over having an account at a financial institution or with a mobile money service provider.

(The Times of India, 21.08.2023)

Women in IT more than double to 20 lakh in a decade, make up 36% of workforce now - The Indian tech sector has added more than a million women in direct employment in the past decade, underscoring concerted efforts from the industry, academia and government in fostering and supporting inclusive action. Indian IT employed 9 lakh women, or 30% of the 3 million directly employed in the sector in 2012-13. That number has doubled to more than 2 million, or 36% of the total workforce of 5.3 million in the industry. A confluence of factors has accelerated women's representation, including companies developing progressive policies to induct more women into the workforce, increased number of colleges offering computer science courses and more women opting for it, visible examples of women in leadership roles and several state governments enacting policy to enable women to work in night shifts. Debjani Ghosh, president of the IT industry's apex body Nasscom, said it is encouraging to see organizations formalising DE&I (diversity, equity & inclusion) strategies, budgeting for it and embedding it as a critical component to organisational culture and values. "We are seeing outstanding efforts from leaders in re-imagining benchmarks and accountability," she said. Ramkumar Ramamoorthy, partner at Catalinics and former CMD of Cognizant India, said the number of seats in computer science engineering and related disciplines has expanded rapidly across India, and in states like Tamil Nadu, it has more than doubled. "Given the nature of work, many female students opt for this discipline of study over others. Two, the pandemic has enabled work to move to where great talent resides, including tier-2 and tier-3 locations, thereby enabling greater women participation. In some progressive companies, women as a proportion of workforce in tier-2 and tier-3 locations is well over 50%," he said. To raise women percentages, companies have introduced special skilling and upskilling programmes, identified women leaders and have offered programmes to help women who took breaks to reintegrate into the workforce. Skilling boost for women techies TCS has 2.2 lakh women employees, constituting 36% of the total workforce of 6.1 lakh employees. In its 2022-23 annual report, the company said it has seen a 60% increase in senior women executives over the last five years. Infosys has 1.3 lakh women employees, comprising 39.4% of its overall workforce. Nasscom's Ghosh said their research finds that women representation is 40% higher in organisations where the senior leadership or the CEO is driving the Diversity, Equity & Inclusion (DEI) agenda. "This corroborates the significance of leadership buy-in for successful DEI outcomes. In the last 16 months, seven states - Telangana, Tamil Nadu, Madhya Pradesh, Haryana, Uttar Pradesh, Himachal Pradesh and Odisha - have issued notifications making it possible for commercial establishments to employ women in night shifts. Karnataka was an early mover in this, coming up with an amendment to the Karnataka Shops and Commercial Establishments Act, 1961. Vikram Shroff, head of HR Law at Nishith Desai Associates, said there continues to be a healthy competition among several progressive Indian states to attract and encourage women at work. Some of the reforms are primarily aimed at removing the night shift work restrictions as was historically contained in the state level labour laws applicable to IT/BPM companies. "These measures tie in well with the overall objectives of companies to promote diversity, equality and inclusion while supporting case laws on equal opportunities at the workplace," he said.

(The Times of India, 22.08.2023)

MGNREGS deadline for mandatory Aadhaar-based wage payments extended till December 31 - With 41% of job card holders under the Mahatma Gandhi National Rural Employment Guarantee Act (MGNREGA) scheme still unprepared for Aadhaar-based wage payments, the Union government has extended its deadline to mandate such payments till the end of the year. This is the fifth extension of the deadline so far. Having reviewed the progress of the Aadhaar-based payment system (ABPS), the Rural Development Ministry said that Aadhaar has been seeded and authenticated for 13.34 crore out of a total 14.33 crore active workers, leaving just over one crore, or 18.11% out of the net. This means that 81.89% of active workers — those who have worked at least one day in the last three financial years — are now eligible for ABPS. In fact, in July 2023, about 88.51% of wage payments were made through the ABPS. The extension, though, was necessitated since out of the 26 crore job card holders under the scheme, 41.1% are still not eligible for this mode.

(The Hindu, 30.08.2023)

Consumer Price Index Numbers for Industrial Workers (CPI-IW) on base 2016=100 and Agricultural and Rural Labourers on base 1986-87=100 for the month of July, 2023

Consumer Price Index Numbers for Industrial Workers - The All-India CPI-IW for July, 2023 increased by 3.3 points and stood at 139.7 (one hundred thirty nine point seven). On 1-month percentage change, it increased by 2.42 per cent with respect to previous month compared to increase of 0.90 per cent recorded between corresponding months a year ago. The maximum upward pressure in current index came from Food & Beverages group contributing 2.86 percentage points to the total change. At item level, Rice, Arhar Dal/Tur Dal, Apple, Mango, Brinjal, Garlic, Ginger, Gourd (Lauki), Chillies Green, Potato, Onion, Tomato, Cumin seed/Jira, Supari, Saree Cotton, Shirt, T-shirt-readymade, School uniform, Leather Sandle, Chappal, Canvas Shoes, House rent, Auto-rickshaw/Scooter fare, Repair/Service Charges, Utensils, Medicine allopathic etc. are responsible for the rise in index. However, this increase was largely checked by Electricity (domestic) Charges, Kerosene oil, etc. putting downward pressure on the index. At centre level, Gurugram recorded a maximum increase of 8.3 points. Among others, 3 centres recorded increase between 7 to 7.9 points, 4 centres between 6 to 6.9 points, 10 centres between 5 to 5.9 points, 15 centres between 4 to 4.9 points, 14 centres between 3 to 3.9 points, 25 centres between 2 to 2.9 points, 9 centres between 1 to 1.9 points and 4 centres between 0.1 to 0.9 points. On the contrary, Keonjhar recorded a decrease of 1.0 point. Rest of two centers index remained stationary. Year-on-year inflation for the month stood at 7.54 per cent compared to 5.57 per cent for the previous month and 5.78 per cent during the corresponding month a year before. Similarly, Food inflation stood at 11.87 per cent against 6.00 per cent of the previous month and 5.96 per cent during the corresponding month a year ago.

(Labour Bureau)

Consumer Price Index Numbers for Agricultural and Rural Labourers - The All-India Consumer Price Index Number for Agricultural Labourers and Rural Labourers (Base: 1986-87=100) for the month of July, 2023 increased by 19 points each to stand at 1215 (One thousand two hundred and fifteen) and 1226 (One thousand two hundred and twenty six) points respectively. The major contribution towards the rise in general index of Agricultural Labourers and Rural Labourers came from food group to the extent of 18.23 and 18.28 points respectively mainly due to increase in prices of rice, wheat atta, pulses, milk, fish-fresh/dry, gur, chillies-green/dry, turmeric, garlic, ginger, onion, mixed spices, brinjal, tomato, gourd, etc. The rise in index varied from State to State. In case of Agricultural Labourers, it recorded an increase of 1 to 29 points in 20 States. Tamil Nadu with 1420 points topped the index table whereas Himachal Pradesh with 932 points stood at the bottom. In case of Rural Labourers, it recorded an increase of 9 to 28 points in 20 States. Tamil Nadu with 1407 points topped the index table whereas Himachal Pradesh with 993 points stood at the bottom. Amongst states, the maximum increase in the Consumer Price Index Numbers for Agricultural Labourers was experienced by Tamil Nadu (29 points) and for Rural Labourers by Tamil Nadu and Kerala (28 points each) mainly due to rise in the prices of pulses, fish fresh/dry, chillies-green/dry, ginger, onion, brinjal, tomato, gourd, etc. Point to point rate of inflation based on the CPI-AL and CPI-RL stood at 7.43% and 7.26% in July, 2023 compared to 6.31% and 6.16% respectively in June, 2023 and 6.60% & 6.82% respectively during the corresponding month of the previous year. Similarly, Food inflation stood at 8.88% and 8.63% in July, 2023 compared to 7.03% and 6.70% respectively in June, 2023 and 5.38% & 5.44% respectively during the corresponding month of the previous year.

German unemployment falls unexpectedly in July - German unemployment fell unexpectedly in July, showing resilience in the labour market despite difficult economic conditions, but the first cracks are appearing. The Federal Labour Office said that the number of people out of work decreased by 4,000 in seasonally adjusted terms to 2.604 million. Analysts polled by Reuters had expected that figure to rise by 20,000. The marginal decline in jobless claims was the first decline since January, halting a cumulative 97,000 increase in claims between February and June, Pantheon Macroeconomics' chief eurozone economist Claus Vistlesen said. The seasonally adjusted jobless rate fell to 5.6%. "The strong labour market has been an important driver of the economy's resilience over the last few years," said Carsten Brzeski, global head of macro at ING. Without the inclusion of Ukrainian nationals, however, there would have been an increase of 8,000 in the number of jobless due to the weak economic environment, Labour Office head Andrea Nahles said. "Companies' demand for labour remains restrained," she said. Not seasonally adjusted, unemployment rose by 62,000, raising the number of unemployed to 2.617 million. The number of unemployed people is 147,000 higher than in July 2022. In July, there were 772,000 job openings, 108,000 fewer than a year ago. Although the Federal Labour Office has seen a slowdown in labour demand in the last year, it remains at a high level. The "almost invincible" German labour market is showing some cracks, Brzeski said. However, he notes that for the current wage negotiations, these first signs of cooling will be too small to have a significant impact. "The longer economic growth remains sluggish and uncertainty persists, the higher the likelihood that unions and employees will increasingly opt again for job security rather than high wage growth," Brzeski said.

Australia July jobs take a surprise fall as market loosens - Australia employment unexpectedly fell in July to end two months of very strong growth, while the jobless rate ticked higher in a sign the drum-tight labour market might finally be loosening. The softer reading stoked speculation the Reserve Bank of Australia (RBA) might be done hiking interest rates and dragged the local dollar down to nine-month lows at \$0.6366. Figures from the Australian Bureau of Statistics (ABS) showed net employment fell 14,600 in July from June, reversing some of June's 31,600 jump and confounding market forecasts of a 15,000 rise. All the losses were in full-time jobs which dropped 24,200. The jobless rate rose to 3.7%, from 3.5%, topping analysts' forecasts of 3.6% and the highest reading since April. The ABS cautioned that the figures were likely impacted by the timing of school holidays in July, which could have artificially depressed the numbers. However, on the face of it the report seemed to support the RBA's case for a "turning point" in the market which should help lessen inflationary pressures. The central bank has paused rate hikes for two months now and investors suspect it may be done tightening. Futures imply only a 50-50 of one more quarter-point hike to 4.35% by the end of the year. "Data are likely to be the final nail in the coffin for any lingering expectations of a rate hike in September," said Ben Udy, lead economist for Oxford Economics, Australia. "Even so, the deterioration in the labour market has a long way to run before the RBA can completely relax." The labour market has proved remarkably resilient with 399,000 net jobs added in the 12 months to July even as interest rates have climbed 400 basis points to a decade-high of 4.1%. Such strong demand for workers has seen wages rise, though not nearly to the extent in some other developed nations. Figures out this week, showed annual wage growth actually eased a touch in the June quarter to 3.6% and well below inflation of 6%, suggesting there was little danger as yet of a price wage spiral developing. Analysts assume the current quarter will be stronger due to a spike in minimum wage awards, but annual growth is still likely to top out around a relatively manageable 4%. "It is getting harder to argue for a sustained lift in wage inflation momentum," said Justin Smirk, a senior economist at Westpac. "We need to have an open mind to the idea there has been a significant change in wage/price setting behaviour and that wage inflation will peak at a lower rate than was initially anticipated."

Generative AI likely to augment rather than destroy jobs - Generative Artificial Intelligence (AI) is more likely to augment than destroy jobs by automating some tasks rather than taking over a role entirely, a new study from the International Labour Organization (ILO) has found. The study, *Generative AI and Jobs: A global analysis of potential effects on job quantity and quality*, suggests that most jobs and industries are only partly exposed to automation and are more likely to be complemented rather than substituted by the latest wave of Generative AI, such as chatGPT. Therefore, the greatest impact of this technology is likely to not be job destruction but rather the potential changes to the quality of jobs, notably work intensity and Clerical work was found to be the category with the greatest technological exposure, with nearly a quarter of tasks considered highly exposed and more than half of tasks having medium-level exposure. The study, which is global in scope, documents notable differences in the effects on countries at different levels of development, linked to current economic structures and existing technological gaps. It finds that 5.5 per cent of total employment in high-income countries is potentially exposed to the automating effects of the technology, whereas in low-income countries, the risk of automation concerns only some 0.4 per cent of employment. On the other hand, the potential for augmentation is nearly equal across countries, suggesting that with the right policies in place, this new wave of technological transformation could offer important benefits for developing countries. The potential effects of Generative AI are likely to differ significantly for men and women, the study finds, with more than twice the share of female employment potentially affected by automation. This is due to women's over-representation in clerical work, especially in high and middle-income countries. Since clerical jobs have traditionally been an important source of female employment as countries develop economically, one result of Generative AI could be that certain clerical jobs may never emerge in lower-income countries. The paper concludes that the socioeconomic impacts of Generative AI will largely depend on how its diffusion is managed. It argues for the need to design policies that support an orderly, fair and consultative transition. Workers' voice, skills training and adequate social protection will be key to managing the transition. Otherwise, there is a risk that only a few, well-prepared countries and market participants will benefit from the new technology. The authors note that the "outcomes of the technological transition are not pre-determined. It is humans that are behind the decision to incorporate such technologies and it is humans that need to guide the transition process".

Acute labour shortages in earthquake-stricken regions of Türkiye - Six months on from the devastating earthquakes that killed tens of thousands of people in Türkiye, a report from the International Labour Organization (ILO) has called for Active Labour Market Policies (ALMPs) to be set up to address acute labour shortages in the affected region. These programmes should focus on the employment of unskilled individuals and on-the-job training tailored to the region's specific needs, the report says. Housing shortages must also be urgently addressed, as well as the restoration of essential public services. More than 55,000 people were killed in the earthquakes, which hit south-eastern Türkiye and north-west Syria in February 2023. The ILO study assessed the impact of the earthquakes on the labour market and potential recovery strategies in Türkiye. It examined how to plan an efficient rebuilding programme to generate income opportunities for the local labour force. It also identified the occupations that will grow the fastest, and the associated skills that will be needed. According to the study, the region in Türkiye where the earthquakes hit contributed to nearly 10 per cent of the country's Gross Domestic Product (GDP), including from agricultural and forestry product exports. The destruction caused by the earthquakes has led to increasing demand in the construction sector for debris removal and rebuilding. However, the region faces significant labour shortages, exacerbated by emigration and a rising demand for unskilled and low-skilled labour. The region needs to attract and retain workers, particularly in agriculture and construction – sectors that will contribute to the recovery process, the report says. The safety and well-being of workforces must be ensured and special attention needs to be given to women, people with disabilities and the many Syrian refugees working in the informal sector. Among several recommendations, the report calls for labour supply incentives, cash supports and wage subsidies.

(ILO News, 28.08.2023)

श्रम निर्णय LABOUR DECISION

Higher qualification can not be prescribed for the financial upgradation under the Assured Career Progression (ACP) scheme.

In the case under reference here, the appellants were appointed Accounts Clerks where the minimum qualification was intermediate. The cadre of Junior Accounts Clerk and Senior Accounts Clerk which existed prior to 1980 merged with effect from 1st May, 1980 and a common cadre of Accounts Clerk came into existence. In 1999, the demerger of the cadre took place and the Clerks came to be retained in their respective cadres without any promotional avenues.

As per the Bihar Accounts Service Rule, 2000 when read along with Schedule I, among other things, for promotion on the basis of grade of service, candidates must possess qualifications which is graduation in case of promotion to Bihar Accounts Service. Further, Bihar State Employees Service Condition (Assured Career Progression/ACP Scheme) Rules, 2003 requires possession of essential qualification prescribed under the rules as necessary for grant of benefit under the scheme i.e. ACP. The applicants invoked the writ jurisdiction of the Court seeking benefit of ACP on completion of 12 years to avoid stagnation and were extended the benefits by the Writ Court keeping in view earlier decisions in similar matters. In appeals of State of Bihar, Division Bench (D.B.) of Patna High Court held that qualification of graduation was not possessed by the appellants and Writ Court committed an error in extending the benefit of ACP to the appellants who were not eligible and qualified for the purpose. In this context, the applicants appealed to Supreme Court and before Supreme Court the sole question which had arisen was: whether the qualification of graduation prescribed for promotion to next higher post of Accounts Officer from that of Accounts Clerk was necessary for the purpose of extending the benefit of ACP?

The contention of the State was that until and unless Account Clerks possessed the minimum educational qualifications of graduation, they were not entitled to promotion in the grade of Bihar Accounts Service. As per the recommendation of the Fifth Pay Commission, ACP scheme was enforced for Group C and D employees to provide monetary benefit to the employees on 12 and 24 years of regular services who were not able to get the promotion. The scheme as such was anti-stagnation and envisages merely placement of the employees in the higher pay scale for the grant of financial upgradation only, without grant of actual promotion. The benefit of the ACP as such was like granting non-functional in situ promotion.

In view of the aforesaid legal position coupled with the fact that the qualification of graduation prescribed was for the promotion to the post of Accounts Officer rather than for the grant of in situ promotion on the non-functional post or for extending the benefit of ACP which was purely and simply in the nature of grant of monetary benefit without actually effectuating any promotion to any higher post, judgement and order of Division Bench of the High Court impugned in the appeals can not be sustained and accordingly hereby set aside and the judgement of the Writ Court was restored. The appellants were extended the benefit of ACP, as directed by the Writ Court. The appeals were allowed in the above terms. There would be no order as to costs.

Notes

1. Prices and Price Indices

1. 1. Consumer Price Index Numbers for Industrial Workers

A.1.1.1. Labour Bureau's Series of All India Consumer Price Index Numbers for Industrial Workers (Base: 2016=100) – The All-India Consumer Price Index Numbers for Industrial Workers on Base: 2016=100 (General and Group-wise) along with Linking Factors with previous base: 2001=100 are presented in Table A.1.1.1. The All India Index is a weighted average of 88 constituent centre Indices compiled by the Labour Bureau. The current series of the Index Numbers has been introduced with effect from September, 2020 index replacing the series on base: 2001=100. The All India General Index as well as Group Indices for previous series on base: 2001=100 can be obtained by multiplying the current series indices by the respective Linking Factors. A note on the scope and methods of construction of these index numbers was published in December 2020 issue of the "Indian Labour Journal". The All India Consumer Price Index Number for the month of July, 2023 increased by 3.3 points with respect to previous month and stood at 139.7 points.

A.1.1.2. Labour Bureau's Series of Consumer Price Index Numbers for Industrial Workers in respect of 88 constituent centres on Base: 2016=100 – The Consumer Price Index Numbers for industrial workers on Base: 2016=100 for 88 centres compiled by the Labour Bureau are presented group wise in Table A.1.1.2 for the months of June, 2023 and July, 2023 The Index Numbers measure the extent to which the overall levels of retail prices of goods and services consumed by Industrial Workers has changed when compared with the base period viz., 2016=100. As compared to previous month, the magnitude of rise/fall in the General Index varies from centre to centre. During July, 2023, Gurugram recorded a maximum increase of 8.3 points. Among others, 3 centres recorded increase between 7 to 7.9 points, 4 centres between 6 to 6.9 points, 10 centres between 5 to 5.9 points, 15 centres between 4 to 4.9 points, 14 centres between 3 to 3.9 points, 25 centres between 2 to 2.9 points, 9 centres between 1 to 1.9 points and 4 centres between 0.1 to 0.9 points. On the contrary, Keonjhar recorded a decrease of 1.0 point. Rest of two centers index remained stationary.

A.1.1.3. Average Monthly Consumer Prices of Selected Articles for Industrial Workers – The average monthly consumer prices of selected articles based on individual quotations obtained from the selected outlets which are utilised in the compilation of Consumer Price Index Numbers (Base: 2016=100) for Industrial Workers for 88 centres for the month of July, 2023 are set out in Table A.1.1.3. The prices reported in the table are averages of open markets prices of specified varieties of an item prevailing in the selected outlets in the selected market(s) in a given centre during the month in case of non-rationed items. So far as rationed items are concerned, the prices for the centres covered under informal rationing are the weighted average prices, the weights being the proportion of the quantity available through Public Distribution System and quantity procured from the open market in different centres in relation to base year requirements of an average family. In case of centres covered under Statutory Rationing, the prices are average of the fair prices of variety (ies) of an item distributed through Fair Price Shops.

1.2. Consumer Price Index Numbers for Agricultural and Rural Labourers:

A.1.2.1 (a) and (b). Labour Bureau's Series of Consumer Price Index Numbers for Agricultural and Rural Labourers on Base: 1986-87=100 - All-India Consumer Price Index Numbers for Agricultural and Rural Labourers on Base: 1986-87=100 replacing the earlier series on base 1960-61=100 were released with effect from November, 1995. The all-India index is a weighted average of 20 constituent State indices compiled by the Labour Bureau for Agricultural and Rural Labourers separately. A detailed note on the scope and method of construction of these indices was published in February, 1996 issue of the Indian Labour Journal.

The Consumer Price Index Numbers (Base: 1986-87=100) for Agricultural and Rural Labourers for 20 States and All-India are presented group-wise in Tables A.1.2.1 (a) and (b) for the months of June, 2023 and July, 2023. These index numbers measure the extent of change in the retail prices of goods and services consumed by Agricultural and Rural Labourers as compared with the base period viz., 1986-87. The All-India Consumer Price Index Number for Agricultural Labourers and Rural Labourers (Base: 1986-87=100) for the month of July, 2023 increased by 19 points each to stand at 1215 (One thousand two hundred and fifteen) and 1226 (One thousand two hundred and twenty six) points respectively.

A.1.2.2 (a) and (b). Monthly Consumer Prices of Selected Articles for Agricultural and Rural Labourers – The monthly consumer prices of selected articles of index basket of agricultural and rural labourers utilized in the compilation of Consumer Price Index Numbers (Base: 1986-87=100) for 20 States separately for Agricultural and Rural Labourers for the month of July, 2023 are given in Tables A.1.2.2. (a) and (b). Though the spatial coverage and the individual sample village price quotations in both the series relating to the Agricultural and Rural Labourers are the same, the weighted prices of items at the State level will be slightly different from each other due to difference in the regional weights in each of the series.

2. Wages and Earnings

A.2.1 (a) and (b). Average Daily Wage Rates for Agricultural and Non-agricultural occupations- In pursuance of the recommendations of the Technical Working Group on rural retail prices set up by the NSO in 1974, Labour Bureau has been compiling and maintaining average daily wage rate data in respect of agricultural and non-agricultural occupations based on the data collected by the Field Operation Division of National Statistical Office (NSO) from a fixed set of 600 sample villages spread over 66 NSS regions in 20 states. Though these wage rate data have been collected since 1986-87, their regular compilation and dissemination started w.e.f December, 1998. The average daily wage rate data was collected for eleven agricultural and seven non-agricultural occupations till October, 2013. However, following the recommendations of the Working Group constituted by the CSO on advice of the National Statistical Commission (NSC), wage rate data is now being collected for 25 occupations (12 agricultural and 13 non-agricultural). The daily wage rate data received from the field are first normalized for eight working hours a day. The simple arithmetic average of these normalized daily wage rates is worked out for each of the 20 states. The average wage rates at all-India level are derived by dividing the sum total of wages of all the 20 states by the number of quotations. These averages are restricted only to those occupations where the number of quotations are five or more in order to avoid the apparent inconsistency in wages paid to different categories of workers on account of differences in number of quotations. The month-wise average daily wage rates are thus worked out at State level and also at all-India level are released regularly to the users through various sources. State-wise and all-India average daily wage rates by occupation and sex for the month of July, 2023 have been presented in Table A.2.1 (a) for agricultural occupations and Table A.2.1 (b) for non-agricultural occupations.

3. Industrial Dispute

A.3.1. Sector / Sphere-wise Number of Disputes, Workers Involved and Mandays Lost due to Industrial Disputes from January to July, 2023 – These statistics are received in the Bureau from the State Labour Departments and Regional Labour Commissioners (Central) in the prescribed format in the shape of monthly voluntary returns covering State and Central Spheres separately. Information on Strikes and Lockouts is collected by the concerned authorities and sent to the Bureau every month. Consolidated information for the year 2023 (as on 31st August, 2023) is presented in Table A.3.1.

A.3.2. Industrial Disputes (All Strikes and Lockouts) during January to July, 2023 - State-wise scenario of Industrial Disputes from January to July, 2023 is presented in Table A.3.2.

NOTES - 1. Labour Bureau takes every care to ensure correctness of the information presented in Sections A and B of the Journal. However, any error, if noticed, may kindly be brought to the notice of the Labour Bureau.

2. The indices given in Sections A and B measure the relative change in Consumer Prices over time at each Centre and as such these cannot be used for comparison of costliness among the different Centres.

खंड ब SECTION B

क्रमिक सांख्यिकी SERIAL STATISTICS

Notes

1. Prices and Price Indices

1.1 Industrial Workers' Consumer Price Index

B.1.1.1 All-India Consumer Price Index Numbers for Industrial Workers – The All India Consumer Price Index Numbers (General and Food) on base 2016=100 are being published since their first release with effect from September, 2020 index replacing the old series on base: 2001=100. The indices for the old base (2001=100) series can be derived by multiplying the 2016 series indices by the Linking Factors, which are 2.88 for the General index and 3.00 for the Food index. Similarly, the indices for 1982 series can be derived by multiplying the 2001 series indices by the Linking factors, which are 4.63 and 4.58 for General and Food group respectively. Further, the indices for the old base (1960=100) series can be derived by multiplying the 1982 series indices by the Linking Factors, which are 4.93 for the General index and 4.98 for the Food index. The Annual Average (Calendar year 2006 to 2022 as well as financial year 2006-07 to 2022-23) and monthly All India Index Numbers (General & Food) alongwith twelve month moving average from July, 2022 to July, 2023 have been presented in Table B.1.1.1.

B.1.1.2 Labour Bureau's Series of Consumer Price Index Numbers for Industrial Workers – Serial statistics in respect of Consumer Price Index Numbers for Industrial Workers on base 2001=100 and new series on base 2016=100 (General Index only) for 88 centres are set out in Table B.1.1.2.

1.2 Consumer Price Index Numbers for Agricultural Labourers

B.1.2.1 (a) and (b) All-India Consumer Price Index Numbers for Agricultural and Rural Labourers (Base: 1986-87=100) – Serial statistics relating to the All-India Consumer Price Index Numbers (General and Food) for Agricultural and Rural Labourers on base 1986-87=100 separately for Agricultural Years 1995-96 to 2022-23, Financial Years 1995-96 to 2022-23 and Calendar Years 1995 to 2022 along with month-wise indices and 12-month moving averages for July, 2022 to July, 2023 are presented in Tables B.1.2.1 (a) and (b) respectively.

B.1.2.2 (a) and (b) Labour Bureau's Series of Consumer Price Index Numbers for Agricultural Labourers and Rural Labourers on Base: 1986-87=100 – Serial statistics in respect of Consumer Price Index Numbers (General Index) for Agricultural Labourers and Rural Labourers (Base: 1986-87=100) for 20 States are given in Tables B.1.2.2 (a) and (b) respectively.

1.3 Consumer Price Index for Rural, Urban and Combined

B.1.3 All india Consumer Price Index for Rural, Urban and Combined - The Consumer Price Index (CPI) for Rural (R), Urban (U) and Combined (C) are compiled and published by the National Statistical Office, Ministry of Statistics and Program Implementation, Govt. of India. The current series of CPI-R, CPI-U and CPI-C on base 2012=100 was released w.e.f. January, 2015 replacing the earlier series on base 2010=100. The All-India Consumer Price Index for Rural, Urban and Combined for the years 2011 to 2022 (Annual Averages) and for July, 2022 to July, 2023 (Monthly Figures) have been presented in Table B.1.3.

1.4 Wholesale Price Index

B.1.4 *All India Index Numbers of Wholesale prices* – The current series of Index Numbers of Wholesale Prices in India on base 2011-12=100 was released w.e.f. April, 2017 by replacing the earlier series on base 2004-05=100. These Index Numbers are compiled and published by the Office of the Economic Adviser, Ministry of Commerce & Industry, and Govt. of India. The indices for the period 2010 to 2022 (Annual Averages) and for July, 2022 to July, 2023 (Monthly Figures) are set out in Table B.1.4. These index numbers are published here to serve as supplementary information to the users of Consumer Price Index Numbers.

2. Wages and Earnings

B.2.1 *Earnings (Basic Wage and Dearness Allowance) of the Lowest-paid Workers/Operatives in Cotton Textile Mills* – The information concerning earnings of cotton producing Centres/States received from the State Governments, Employers' Associations and Individual Units is presented in Table B.2.1. The earnings of workers include minimum basic wage and dearness Allowance by whatever name called. The dearness allowance is linked to the Working Class Consumer Price Index Numbers of different Centres and varies from month to month according to the variation in the index.

3. Industrial Disputes

B.3.1 *Industrial Disputes (All Strikes and Lockouts)* – Industrial Disputes Statistics for the Years 2013 to 2023 are presented in Table B.3.1.

1. कीमते एवं मूल्य सूचकांक PRICES AND PRICE INDICES

#- No Linking Factor as these centres were not covered in the earlier series.

* Rounded up from second decimal place.

Linking Factor – Figures on previous base (General Index) can be obtained by multiplying the index numbers of new base by the respective linking factors given against each centre and rounding off the result to the nearest whole number.

1.2 कृषि एवं ग्रामीण श्रमिकों के लिए उपभोक्ता मूल्य सूचकांक Consumer Price Index Numbers for Agricultural and Rural Labourers

तालिका ब.1.2.1 (अ) - कृषि श्रमिकों के लिए वर्ष-वार अखिल भारतीय औसत उपभोक्ता मूल्य सूचकांक (सामान्य एवं खाद्य आधार: 1986-87 = 100)

Note: -(i) Agricultural Year (July to June). (ii) Financial Year (April to March). (iii) New series of Consumer Price Index Numbers for Agricultural Labourers on Base: 1986-87=100 released w.e.f. November, 1995. To obtain indices on Base: 1960-61=100, the index figures need to be multiplied by the linking factor as below:-
General Index - 5.89, Food Index - 6.38

@ = औसत केवल 8 महीनों अर्थात् नव., 95 से जून, 96 तक पर आधारित/Average based on 8 months i.e. Nov., 95 to June, 96 only.

^ = औसत केवल 5 महीनों अर्थात् नव., 95 से मार्च, 96 तक पर आधारित/Average based on 5 months i.e. Nov., 95 to March, 96 only

\$ = औसत केवल 2 महीनों अर्थात् नव., 95 से दिस., 95 तक पर आधारित/Average based on 2 months i.e. Nov., 95 and Dec., 95 only.

तालिका ब.1.2.1 (ब) - ग्रामीण श्रमिकों के लिए वर्ष-वार अखिल भारतीय औसत उपभोक्ता मूल्य सूचकांक (सामान्य एवं खाद्य आधार: 1986-87 = 100)

Everyone should be respected as an individual, but no one idolized.

Albert Einstein

Real education enhances the dignity of a human being and increases his or her self-respect. If only the real sense of education could be realized by each individual and carried forward in every field of human activity, the world will be so much a better place to live in.

A. P. J. Abdul Kalam
