PREFACE

It is my pleasure to present the 11th issue of "Wage Rates in Rural India" compiled by Labour Bureau. Daily wage rate data in respect of 18 agricultural and non-agricultural occupations are being collected every month in one of the blocks of Schedule 3.01(R) with Rural Retail Prices from 600 sample villages, spread over 66 NSS regions of 20 states of the country. State-wise and All India average daily wage rates are compiled and published every month in "Indian Labour Journal" since April, 1998. It is also available on our website <http://labourbureau.nic.in>.

Basic idea behind the publication of this booklet is to facilitate the access of information to the users at one place. The data collected is utilized for the study of cost of cultivation and revision of support/procurement prices of agricultural crops. Moreover, it also meets the requirement of complimentary data for studies relating to enforcement of minimum wages in agriculture. In view of its utility and value for the policy makers including other users, the wage rate data for the agricultural year 2007-08 are presented in this booklet in a compact form.

I place on record my appreciation for sincere and commendable efforts put in by the officers and staff of Wage Rate Unit (Annexure-II) of Labour Bureau in bringing out this publication.

Bureau would welcome the suggestions for improvement in the quality and the contents of this publication.

1. SUMMARY OF MAIN FINDINGS

The main findings of the data are summarised below :

a) **Agricultural occupations:**

1. All-India annual average daily wage rates in different agricultural occupations during the year 2007-08 varied widely from Rs.47.64 for male 'herds-keepers' to Rs.106.96 for male labour engaged in 'well digging'; from Rs.37.78 for female 'herds-keepers' to Rs.62.31 for the female labourers engaged in 'harvesting' activities; and from Rs.31.40 for child 'herds-keepers' to Rs.45.70 for those employed in 'transplanting' occupations.

Table 1 (a)

2. Amongst agricultural occupations, 'well digging' was observed to be the highest paid occupation for men possibly on account of the requirement of skill and risk in the performance of the activity followed by 'ploughing' and 'sowing' occupations. During the year 2007-08, the all-India average daily wage rates in 'well digging' ranged between Rs. 111.58 in September, 2007 to Rs.103.95 in April, 2008

Table 1 (a)

3. 'Harvesting' occupation fetched maximum wages for women followed by 'transplanting' and 'threshing' occupations. The all-India average daily wage rates for women in 'harvesting' occupation ranged between Rs.60.62 in July, 2007 and Rs.66.11 in June,2008.

Table 1 (a)

4. Children got highest wages in 'transplanting' occupation in the range of Rs.44.00 in July,2007 to Rs.48.24 in June,2008, followed by 'sowing' and 'harvesting' occupations.

Table 1 (a)

5. During 2007-08, 'herds-keeping' was observed to be the least remunerative occupation for men, women and child workers as the annual average daily wage rates in this occupation were reported to be as low as Rs.47.64, Rs.37.78 and Rs.31.40 respectively.

Table 1 (a)

b) Non-agricultural occupations:

1. The all-India annual average daily wage rates in non- agricultural occupations during the year 2007-08 also varied widely from Rs.59.40 for male 'sweepers' to Rs.143.06 for male 'masons'; from Rs.55.55 for female 'unskilled labourers' to Rs.57.49 for female 'sweepers'. In case of children, due to non-receipt of sufficient number of quotations, the average daily wage rate could be calculated for 'unskilled labourers' only, which worked out to Rs.35.98.

Table 1 (b)

2. Amongst non-agricultural occupations, 'masonry' was observed to be the highest paid occupation for men, followed by 'carpentry' and 'tractor driving'. During the year 2007-08, the all-India average daily wages for male 'masons' ranged between Rs.137.72 in July, 2007 to Rs.148.60 in June, 2008.

Table 1 (b)

3. 'Sweeping' was the highest paid occupation for women as their all-India average daily wages in that occupation varied from Rs.53.40 in July, 2007 to Rs.59.67 in April, 2008.

Table 1 (b)

4. During the year 2007-08, the all-India average daily wages for children engaged as 'unskilled labourers' ranged between Rs.33.36 in July, 2007 and Rs.38.35 in June, 2008.

Table 1 (b)

5. 'Sweeping' was found to be the lowest paid occupation for men during the year under reference with an all-India average daily wage rate of Rs.59.40. For women and children 'Unskilled labour' was observed to be the lowest paid occupation with an average daily wage rates of Rs.55.55 and Rs.35.98 respectively.

Table 1 (b)

6. The average daily wage rates for women were found to be generally lower than those for men in most of the occupations. These may be attributed to variation in the number of quotations as the wage differential based on sex was not that significant at sample village level.

7. None of the female workers were found engaged as 'blacksmiths', 'cobblers' and 'tractor drivers' and hence no wage rate was reported for these occupations during the year 2007-08.

c) Monthwise Average daily wage rates of states in Agricultural and non-agricultural occupations :

1. Amongst states, the highest average daily wage rates are reported in all the occupations in Kerala in all the months of the year.

Table 3 (a) to 14 (b)

2. After Kerala, in the two hill states of Himachal Pradesh and Jammu & Kashmir, average daily wage rates in all the months are higher than developed states like Maharashtra, Gujarat, Punjab and Haryana.

Table 3 (a) to 14 (b)

3. The lowest average daily wage rates in all the occupations for all the months of the year are reported from Madhya Pradesh.

Table 3 (a) to 14 (b)

2. METHODOLOGY FOR COMPILATION OF THE WAGE RATE DATA

2.1. INTRODUCTION

It is universally accepted that a number of factors determine the agrarian structure of a country such as physical features, natural resources, population growth, pressure on land, economic development rate, level of effective utilization of resources and the institutional factors namely land systems and inheritance law.

None can deny the fact that in the resources hierarchy of India, agriculture enjoys the utmost importance. Agriculture is not only an economic activity but a way of life also. It is the main source of man-power supply to the fast growing industrial sector in India. As such, its inherent problems are at the root of all other problems. Moreover, agricultural labour constitutes the most valuable segment of the unorganised work force. Being unorganized and scattered, the rural labour is deprived of the benefits of labour enactments and employer-employee relationships which their counterparts enjoy in the organized sector of the industries. Agricultural labourers have to contain themselves with the casual employment and frequent changes of employers as well as places and no fixed pay either.

Coupled with this is scanty information base on the working and living conditions of this segment. The only major source of reliable information on socio-economic conditions of the rural labour is the Rural Labour Enquiry conducted on quinquennial basis. Consumer Price Index Numbers for Agricultural and Rural Labourers, released by the Bureau on monthly basis, provide data for the fixation and revision of minimum wages in agriculture under the Minimum Wages Act, 1948. This data has also been found useful for the calculation of State/National Income and in the assessment of cost of cultivation of crops.

Technical Working Group on rural retail prices set up by the NSSO in 1974 in its recommendation to revise/update the series of Consumer Price Index Numbers for Agricultural and Rural Labourers, felt the need for a regular in-flow of wage data for rural workers. Since the prices and wages are related to each other, it was felt that it would be useful if trend of these two characteristics were available on the basis of

same coverage. The Group, therefore, suggested for collection of wage rates for a number of occupations from a suitable sample of villages in various states so that fairly representative picture of wage situation is available for the entire country on continuous basis.

In view of the recommendations of the Group, the wage rate data in respect of 11 agricultural and 7 non-agricultural occupations entailing manual work are being collected along with rural retail prices from 600 sample villages spread over 20 states in the country since July, 1986 with the following objectives:

- i) for enforcement of minimum wages fixed/revised by the Government;
- ii) for drawing up and implementation of Wage Policy; and
- iii) for estimation of State Domestic Product/National Income and Cost of Cultivation studies.

The compilation of wage rate data was held in abeyance for some time, owing to some problem with regard to the veracity of data with reference to the purpose for which it was being collected. During the year 1995, the Governing Council of the National Sample Survey Organisation not only sorted out the problems but also recommended that the wage rate data should continue to be collected and published every month. In pursuance of the recommendation of the Council, the Labour Bureau took up the work of compiling wage rate data since the agricultural year 1995-96. These data are now being compiled on regular monthly basis and published in monthly publication, the **Indian Labour Journal**, w.e.f. April, 1998.

2.2. SAMPLE SIZE

Since the rural retail prices for compilation of CPI Numbers for Agricultural/Rural Labourers and wage rates are collected from the same set of sample villages, the state-wise sample size was, therefore, decided by the Working Group as per the need for constructing the CPI No's for (i) Agricultural and for (ii) Rural Labourers.

The state-wise distribution of the number of regions, strata and sample villages is given below:

Sl.No.	State	Region	Strata	Sample village
1	Andhra Pradesh	4	18	54
2	Assam	3	8	27
3	Bihar	3	13	39
4	Gujarat	5	10	30
5	Haryana	2	4	12
6	Himachal Pradesh	1	3	9
7	Jammu & Kashmir	3	5	21
8	Karnataka	4	11	36
9	Kerala	2	5	21
10	Madhya Pradesh	7	23	69
11	Maharashtra	6	18	54
12	Manipur	2	2	9
13	Meghalaya	1	2	9
14	Orissa	3	8	33
15	Punjab	2	5	15
16	Rajasthan	4	7	21
17	Tamil Nadu	4	11	33
18	Tripura	1	3	9
19	Uttar Pradesh	5	20	60
20	West Bengal	4	11	39
Total		66	187	600

2.3. COLLECTION OF DATA

The wage rate data, along with rural retail prices are being collected by the Field Operations Division of the National Sample Survey Organisation from 600 sample villages spread over 66 NSS regions of 20 States by canvassing Block-5 (Annexure-I) of Schedule 3.01(R). Data collection from these sample villages is staggered over four weeks of a month with one-fourth of them being covered every week. The days of canvassing of Schedule 3.01(R) are fixed. The village functionaries like the Panchayat Secretary, Progress Assistant, Patwari and other Village or Block Officials are the primary informants for data on wage rates. The data on normal working hours and the prevailing wage rates in cash and kind for the reported working hours are collected sex-wise for each of the 18 selected occupations in 20 states.

The selected occupations for which daily wage rates are being collected every month are as follows:

A. Agricultural Occupations

1. Ploughing
2. Sowing
3. Weeding
4. Transplanting
5. Harvesting
6. Winnowing
7. Threshing
8. Picking
9. Herdsman
10. Well Digging
11. Cane Crushing

B. Non-agricultural Occupations

1. Carpenter
2. Blacksmith
3. Cobbler
4. Mason
5. Tractor Driver
6. Sweeper
7. Unskilled Labour (un-specified)

2.4. PROCESS OF COMPILATION OF AVERAGE WAGE RATES

The data received from the field is posted separately for agricultural and non-agricultural occupations for 20 states every month. In case the wage rates are reported for a duration of less or more than the normal working hours, then these are first adjusted for eight hours working day. Payment of wages is made in cash and/or in kind. Payments in kind are very common in rural areas which include foodgrains, cooked food, tea, fuel, cigarette, bidi, fodder, etc. Wages reported in kind are evaluated at the prevailing local retail prices. Thereafter, data is thoroughly scrutinised and discrepancies, if any, are referred back to the field for clarification. In the next stage, the simple arithmetic average of these normalised daily wage rates is worked out, occupation-wise and sex-wise for each State as follows:

$$W = \frac{1}{n} \sum_{i=1}^n W_i$$

Where 'W' represents wage and 'n' number of villages in the State.

Similarly, the average wage rates at all-India level are derived by dividing the sum total of wages of all the 20 States by the number of quotations. State-wise averages are restricted only to those occupations where the number of quotations are five or more in order to avoid inconsistency in wages paid to different categories of workers on account of difference in number of quotations. However, for working out all-India averages all those neglected quotations are taken into account to arrive at total number of quotations at all-India level. At all-India level also, the number of quotations for working out occupation-wise averages are restricted to five or more.

The present publication provides wage rate data in respect of 11 agricultural and 7 non-agricultural occupations for 20 states and all-India for the agricultural year 2006-07. The dash (-) in Tables against various occupations indicate that no wage rate was reported during the reference month for various reasons, such as:

- (i) either the activity connected with the occupation was not undertaken in the State; or
- (ii) the activity was out of season in the State; or
- (iii) the particular category of workers (i.e. Men/Women/Children) were not engaged in that operation.
