

Wage Rates in Rural India

(July, 1998 to June, 1999)

**LABOUR BUREAU
MINISTRY OF LABOUR
GOVERNMENT OF INDIA
SHIMLA/CHANDIGARH
2000**

PREFACE

This issue of the publication titled " Wage Rates in Rural India "is the second in the series and contains daily wage rate statistics relating to 18 agricultural and non-agricultural occupations in the country for the period July,98 to June,99. These daily wage-rates, State-wise and All-India, have already been published on monthly basis in our regular monthly publication, the **Indian Labour Journal**. Purpose of reproduction of these data in the shape of booklet is to facilitate the access of information to users at single source. Wage rates statistics presented in the booklet may be useful to policy makers for fixation and revision of wages in respect of employments in rural areas including agricultural labour. These statistics can also be used for measuring cost of cultivation and fixation of support/ procurement prices for agricultural crops. Data on wage rates is being collected alongwith the monthly price data for the compilation of the Consumer Price Index Numbers for Rural/ Agricultural Labourers from 600 sample villlages regularly every month w.e.f.July 1986 on the recommendations of Governing Council of the NSSO.

Officers and staff of wage rate unit (Annexure --II) of Rural Labour Enquiry Division of Labour Bureau deserve appreciation for their sincere and commendable efforts in bringing out this useful publication.

Suggestions are welcome for improvement of this publication.

AVERAGE DAILY WAGE RATES IN RURAL INDIA

INTRODUCTION

Rural labour in general and agricultural labour in particular constitutes the weakest section of our population in the country. It is so for variety of reasons – social, economic and political. The wage structure in the rural areas has its own peculiarities which have developed as a result of cumulative effect of certain basic factors like seasonality of agriculture, orthodox outlook of rural folks, absence of trade unionism, widespread under-employment and low level of literacy. The job opportunities available outside agriculture are not adequate to absorb the labour rendered redundant during slack agricultural season. Unlike their industrial counterparts, agricultural labourers do not have the benefit of firm employee – employer relationship. Most of them are casual workers offering their labour on day to day basis involving frequent change of employers. There is no fixed pay period either. Payments in kind is a common feature. Besides wages in cash and/or kind, workers are often in receipt of certain perquisites like cooked food, beverages, tobacco or bidi, pan, tea and fodder etc.

Thus, in nut-shell the information base about the working and living conditions of this segment of labour force is very scanty. We know about their living conditions either through case studies or through occasional surveys. Although the detailed data on certain aspects (such as wage earning, indebtedness, consumption expenditure and employment and unemployment) are available through the Agricultural/Rural Labour Enquiries being conducted at frequent intervals but these do not facilitate the regular study regarding the trends in the movement of all other characteristics. Even in regard to the facets covered in the R.L.E., the information about the intervening period has to be deduced by interpolation and extrapolation. Thus on facets not covered in the enquiry, one has

to rely on case studies, which incidentally are not comprehensive. The only indicator relating to this class of population which is available on regular basis is the monthly Consumer Price Index Numbers for Agricultural Labourers/Rural Labourers. These indices provide the basic information required for fixation/revision of minimum wages for rural labour in different scheduled employments by State governments.

To fill-up this vital data gap the Technical Working Group on Rural Retail Prices, set up by the NSSO in its recommendation to revise/up date the series of C.P.I. felt that the regular wage data for rural workers are of paramount importance for drawing up and implementation of wage policy. This data was also found useful in the estimation of State/National income and in studies on cost of cultivation of crops. In view of its vital importance the Group suggested to collect "the wage rate of large set of occupations from a suitable selected sample of villages in various States so that a fairly representative picture of wage situation is available for the entire country on a continuous (monthly)basis". It was felt that since prices and wages are complementary to each other it will be useful if the trend of these two characteristics are available on the basis of same coverage. In pursuance of these recommendations of the Group the wage rate data on eighteen agricultural and non-agricultural occupations entailing manual work is being collected alongwith rural retail prices as a part of the scheme of rural labour enquiry from 600 sample villages spread over 20 States in the country since 1986-87 with the following objectives-

- i) meeting the requirements of complementary data for enforcement of Minimum Wages.
- ii) meeting the requirements of drawing up and implementation of wage policy; and
- iii) meeting the requirements in estimation of SDP/National Income and Cost of Cultivation Studies.

The selected occupations for which the daily wage rate data is being collected are as follows:

Agricultural Occupations

1. Ploughing
2. Sowing
3. Weeding
4. Transplanting
5. Harvesting
6. Winnowing
7. Threshing
8. Picking
9. Herdman
10. Well Digging
11. Cane Crushing

Non-agricultural Occupations

1. Carpenter
2. Blacksmith
3. Cobbler
4. Mason
5. Tractor Driver
6. Sweeper
7. Unskilled Labour

Initially, there were some problems with regard to the veracity of data with reference to the purpose for which it was being collected. The Governing Council of the NSSO referred the matter to a small Group to look into various issues relating to the quality and authenticity of data collected on wage rates of 18 occupations. On the basis of the result of the comparative study undertaken by the Survey Design and Research Division (SDRD) of the NSSO on the wage rate data being collected by the Ministry of Agriculture and the NSSO, the Governing Council recommended that the data on wage rate should continue to be collected and be published regularly. Accordingly, the data is being published regularly in our monthly publication viz. the Indian Labour Journal.

SAMPLE DESIGN AND METHODOLOGY

As a part of Rural Labour Enquiry, daily wage rates in respect of eighteen agricultural and non- agricultural occupations are collected every month from a fixed set of 600 sample villages spread over 20 States, 66 regions and 187 strata by National Sample Survey Organisation in schedule 3.01 (R) (Annexure-I) designed for collection of rural retail prices for the

purpose of compilation of Consumer Price Index Numbers for Agricultural and Rural Labourers on behalf of Labour Bureau. State-wise distribution of regions, strata and sample villages is given below.

Sl.No.	State	Region	Strata	Sample village
1	Andhra Pradesh	4	18	54
2	Assam	3	8	27
3	Bihar	3	13	39
4	Gujarat	5	10	30
5	Haryana	2	4	12
6	Himachal Pradesh	1	3	9
7	Jammu & Kashmir	3	5	21
8	Karnataka	4	11	36
9	Kerala	2	5	21
10	Madhya Pradesh	7	23	69
11	Maharashtra	6	18	54
12	Manipur	2	2	9
13	Meghalaya	1	2	9
14	Orissa	3	8	33
15	Punjab	2	5	15
16	Rajasthan	4	7	21
17	Tamil Nadu	4	11	33
18	Tripura	1	3	9
19	Uttar Pradesh	5	20	60
20	West Bengal	4	11	39
Total		66	187	600

State-wise sample sizes were decided by the Working Group keeping in view the need for CPI numbers for Agricultural/Rural Labourers. Sample size for a state has been allocated to the NSS region in proportion to their rural population and in multiple of 3. Within each region strata have been formed

by grouping contiguous districts as far as possible. The allocation to a stratum is generally three villages and multiple of three in some cases. In each stratum, three or six villages have been selected circular systematically to form three batches of villages. Sample size so determined has been adopted for collection of wage rate data also by appending a separate block in Schedule 3.01 (R) designed for collecting rural retail prices for the purpose of compilation of CPI numbers.

Data on daily wage rates and normal working hours for some 18 manual activities (agricultural and non-agricultural) are collected through the schedule to provide complementary data for enforcement of minimum wages, the formulation of wage policy, estimation of State Domestic product/National Income and study of cost of cultivation etc. For collection of data on wages, village functionaries like Panchayat Secretary, Progress Assistant, Patwari, other village or block officials are the primary source. The 'kind' part of the wages is evaluated at local retail prices. These wage rates are collected once in a month in each of the 600 selected villages. The days of canvassing of Schedule 3.01 (R) are fixed. The data on normal working hours and the wage rates for the reported working hours are collected sex-wise for each of the 18 selected occupations. The wage rates are first normalised for eight normal hours working day. In the next stage the simple arithmetic average of these normalised daily wage rates is worked out for each state as follows:

$$\frac{1}{n} \sum_{i=1}^n W_i$$

Where 'W' represents wage and 'n' number of villages in the State.

The average of daily wage rates at all-India level are also derived by taking simple average of State figures.

This booklet provides wage rates for 20 States and All-India in respect of 18 agricultural and non-agricultural occupations for 12 months of the agricultural year 1998-99 in Tables 1 to 12 (July, 1998 to June, 1999). The dash (-) in the tables against various occupations indicate that no wage rate was reported during the reference month for various reasons, such as:

- i) the activity connected with the occupation was not undertaken in the State; or
- ii) the activity was out of season in the State; or
- iii) the particular category of workers (i.e. Men/Women/Children) were not engaged in that operation.

Wage Rates in Rural India (New Series) July, 1998 to June, 1999

Summary

As a part of Rural Labour Enquiry, the daily wage rates in respect of eighteen agricultural and non agricultural occupations from a fixed set of 600 sample villages spread over 20 States (i.e. Andhra Pradesh, Assam, Bihar, Gujarat, Haryana, Himachal Pradesh, Jammu & Kashmir, Karnataka, Kerala, Madhya Pradesh, Meghalaya, Maharashtra, Manipur, Orissa, Punjab, Rajasthan, Tamil Nadu, Tripura, Uttar Pradesh and West Bengal) are being collected along with rural retail price data in schedule No. 3.01(R) by National Sample Survey Organisation since 1986-87. Analysis of the data was withheld due to some technical problems which was ultimately sorted out by the Governing Council of NSSO in 1995. Accordingly, Labour Bureau took up the compilation of wage rate statistics since the agricultural year 1995-96. Occupation and sex-wise wage rates paid in different States for the year 1998-99 have been presented in the booklet titled "Wage Rates in Rural India". Some of the highlights of the data presented in the Booklet are given here as under:

An analysis of the month-wise wage rate data for the agricultural year 1998-99 (i.e. July, 1998 to June, 1999) reveal that among agricultural occupations, well digging was observed to be the highest paid occupation for men during the major part of the year. At all-India level, the average wage rate for well digging was found in the range of Rs. 62.42 to Rs. 74.55 during the year 1998-99. For women, 'harvesting' was the highest paid occupation as the daily wage rate ranged between Rs. 44.20 and Rs. 50.52. Similarly, children got highest daily wage rate in winnowing occupation in the range of Rs. 29.29 to Rs. 42.02. On the other hand, the herdsman was noticed to be the least paid occupation for men. The all-India average daily wage rate for herdsman (man) ranged between Rs. 36.88 to Rs. 38.08 during the period under reference. Women also got least daily wage rates in herdsman occupation. Average daily wage rate for women ranged from Rs. 29.66 to Rs. 32.59 during the year 1998-99. Likewise, children fetched lowest daily wage in herdsman occupation in the range of Rs. 21.51 to Rs. 23.56.

Amongst non-agricultural occupations, 'mason' was found to be the highest paid occupation for men. At All- India level, the average daily wage rate for mason ranged between Rs. 97.81 to Rs.103.92 during the year 1998-99. In women category, the unskilled labourers fetched the highest wage rate in the range of Rs. 39.76 to Rs. 44.15 during the year 1998-99. Similarly, children fetched highest wage in the range of Rs.30.71 to Rs.54.29 in carpenter occupation. On the other hand, the sweeper (man) got least wage in the range of Rs. 41.18 to Rs.46.92 during the year 1998-99. For women, blacksmith was observed to be the least paid occupation. Daily wage rate for women in blacksmith occupation ranged between Rs. 26.67 to Rs. 40.00 during the year 1998-99. Likewise, the children got lowest daily wage rate in sweeper occupation. The average daily wage rate ranged between Rs. 23.17 to Rs. 27.20 during the year 1998-99. None of the female workers was observed to be engaged in carpenter activity throughout the year. As in the case of agricultural occupations, almost all the States depicted similar trend as was observed in the case of all-India.

The difference of wages among men, women and children is quite evident from the data. For instance, in ploughing occupation in July,1998, average daily wage rate for man was Rs. 64.87 whereas it was Rs. 30.99 for woman and Rs. 30.97 for Child. Similarly, Unskilled Labourers fetched Rs. 54.85 (Man), Rs. 43.06 (Woman) and Rs. 33.88 (Child) as average daily wages during June,1999.

17	स्वीपर Sweeper										
18	अकौशल मजदूर Unskilled Labourer										

*स्पष्ट करें, कपास, जूट, चाय, इत्यादि/*Specify, cotton, jute, tea, etc.

टिप्पणी :- 1. यदि कर्मकार जैसे नुहार, मोपी, बड़ई इत्यादि पूरे दैनिक मजदूरी के आधार पर कोई कार्य में नहीं लगाए जाते हो और ऐसे व्यक्ति किसी भी कार्य की बंदोबस्त कर रहे हों जैसे नुहार एक कुदाली बनाता है और उसके बनाने के वेतन लेता है। ऐसी रीति में यह मालूम करने का प्रयत्न किया जाए कि इन्होंने कुदाली बनाने में कितना समय लगाया है और उसके कितने वेतन लिए। इस प्रकार से उसके पूरे दिन की मजदूरी अनुमानित की जा सकती है। इसी प्रकार से दूसरों की मजदूरी भी अनुमानित की जा सकती है।

Notes :- 1. If workers like blacksmith, cobblers, carpenter, etc. are not engaged on full day or daily wage basis the item of work undertaken by them on piece-rate basis, the hours spent and payment made for the same may be recorded for estimating normal hours of work as well as the daily wage rate.

2. यदि मजदूरी/वेतन प्रति दिन के हिसाब से नहीं दिए जाते हों और इसका अनुमान मासिक आधार पर किया जाता हो इस प्रकार के अनुमान का विवरण कॉलम नं 12 में पूर्ण टिप्पणी के साथ किया जाए।
2. If wages/salaries are paid on non-daily i.e., monthly etc. basis the actual wages/salaries so paid may be recorded along with suitable remarks in col. 12.
3. जिनमें किए गए अनुमान का मुद्रांकन स्थानीय फुटकर मूल्यों के आधार पर किया जाए। जिस/जिसे जिनका अनुमान किया गया है उसका नाम कॉलम नं 12 में लिख दिया जाए।
3. Payments in kind are to be evaluated at local retail prices. The name of the item/items paid in kind may please be noted in col. 12.
