Wage Rates in Rural India

July, 2000 to June, 2001

LABOUR BUREAU
MINISTRY OF LABOUR
GOVERNMENT OF INDIA
SHIMLA/CHANDIGARH
2002

PREFACE

This edition of the publication titled "Wage Rates in Rural India" is the 4th in the series being brought out by the Labour Bureau annually. Daily wage rate data in respect of 18 agricultural and non-agricultural occupations are being collected every month along with Rural Retail Prices utilised in the construction of Consumer Price Index Numbers for Agricultural /Rural Labourers from 600 sample villages spread over 66 NSS regions of 20 States of the Indian Union. State-wise and All-India average daily wage rates are compiled and released every month on regular basis and published in the "Indian Labour Journal" with effect from April, 1998. These data are utilised in cost of cultivation studies for fixation and revision of support/procurement prices of agricultural crops. It also meets the requirement of complementary data for the studies relating to enforcement of minimum wages in agriculture. Keeping in view its utility and value for policy makers and other users, the wage rate data for the agricultural year 2000-01 are being presented in a compact form in this booklet.

In the present edition of the publication, an effort has been made to change the formats of some of the existing tables and also some new tables have been introduced with a view to present an over-all picture of Wage Rates in Rural India during 2000-2001.

I would like to express my appreciation to the officers and staff of Wage Rate Unit (Annexure-II) of the Labour Bureau for their sincere and commendable efforts in bringing out this publication.

Suggestions for further improvement in the quality and content of this publication are welcome.

METHODOLOGY FOR COMPILATION OF WAGE RATE DATA

INTRODUCTION

Rural labour constitutes the weakest segment of our society. We know little about the working and living conditions of this segment of the labour force. The Rural Labour Enquiries conducted on quinquennial basis are the only source of information on socio-economic characteristics of rural/agricultural labourers. The monthly Consumer Price Index numbers for Agricultural/Rural Labourers also provide the basic information required for fixation/revision of minimum wages for rural labour. Still we do not have reliable wage rate data for rural workers required for drawing up and implementation of wage policy.

To fill-up this vital gap, the Technical Working Group on Rural Retail Prices, set up by the NSSO, in its recommendations to revise/up-date the series of Consumer Price Index Numbers for Agricultural Labourers suggested to collect wage data for rural workers on continuous monthly basis. This data was also found useful in the estimation of state/national income and in studies on cost of cultivation of crops. Since prices and wages are related to each other, the Group recommended to collect wage rate data and rural retail prices from the same set of sample villages. In pursuance of these recommendations of the Group, the wage rate data on eighteen agricultural and non-agricultural occupations entailing manual work are being collected every month since 1986-87 along with rural retail prices, as a part of the scheme of Rural labour Enquiry, from 600 sample villages spread over 66 N.S.S. regions in 20 states.

The selected occupations for which the daily wage rate data is being collected are as follows:

Agricultural Occupations

- 1 Ploughing
- 2 Sowing
- 3 Weeding
4. Transplanting
5. Harvesting
6. Winnowing
7. Threshing
8. Picking
- 9 Herdman
10. Well Digging
11. Cane Crushing

Non-agricultural Occupations

1. Carpenter
2. Blacksmith
3. Cobbler
4. Mason
5. Tractor Driver
6. Sweeper
7. Unskilled Labourer (un-specified)

The compilation and publication of wage rate data were kept in abeyance due to some problems with regard to the veracity of data with reference to the purpose for which it was being collected. The Governing Council of the NSSO sorted out the problem in 1995 and it recommended that the data on wage rate should continue to be collected and published regularly. Consequently, the Labour Bureau took up the compilation of wage rate data since the agricultural year 1995-96. These data are now

being published regularly in our monthly publication, the **Indian Labour Journal**, w.e.f. April, 1998 with the following objectives:

- i) meeting the requirements of complementary data for enforcement of minimum wages fixed/revised by the Government;
- ii) meeting the requirements of drawing up and implementation of Wage Policy, and
- iii) meeting the requirements in estimation of State Domestic Product/National Income and Cost of Cultivation studies.

SAMPLE DESIGN

As stated earlier, the wage rates are collected from the same set of sample villages meant for collection of rural retail prices for compilation of CPI numbers for Agricultural/Rural Labourers. Therefore, the State-wise sample sizes were decided by the Working Group keeping in view the need for constructing CPI numbers for Agricultural/Rural Labourers. A number of regions were formed within a State by grouping contiguous districts which were in similar agro-climatic conditions and cropping pattern. Within each region, strata were formed by treating each district as a separate stratum. However, smaller districts were merged according to similarity of agro-climatic conditions and cropping pattern to form a separate stratum. The allocation to a stratum is generally three villages and multiple of three in some cases. In each stratum, three or six villages have been selected circular systematically to form three batches of villages. Sample size so determined has been adopted for collection of wage rate data also by appending a separate block in Schedule 3.01 (R) designed for collecting rural retail prices for the purpose of compilation of the CPI numbers.

The state-wise distribution of regions, strata and sample villages is given below:

Sl.No.	State	Region	Strata	Sample village
1	Andhra Pradesh	4	18	54
2	Assam	3	8	27
3	Bihar	3	13	39
4	Gujarat	5	10	30
5	Haryana	2	4	12
6	Himachal Pradesh	1	3	9
7	Jammu & Kashmir	3	5	21
8	Karnataka	4	11	36
9	Kerala	2	5	21
10	Madhya Pradesh	7	23	69
11	Maharashtra	6	18	54
12	Manipur	2	2	9
13	Meghalaya	1	2	9
14	Orissa	3	8	33
15	Punjab	2	5	15
16	Rajasthan	4	7	21
17	Tamil Nadu	4	11	33
18	Tripura	1	3	9
19	Uttar Pradesh	5	20	60
20	West Bengal	4	11	39
Total		66	187	600

COLLECTION OF DATA

The data on daily wage rates are collected every month along with rural retail prices from 600 sample villages spread over 66 NSS regions in 20 states by canvassing schedule 3.01(R) by the staff of Field Operations Division of the NSSO. Collection of data from these sample villages is staggered over the four weeks of a month with one-fourth of the sample being covered every week. The days of canvassing of schedule 3.01(R) are fixed. The village functionaries like panchayat secretary, progress assistant, patwari, and other village or block officials are the primary informants for collection of data on wage rates. The data on normal working hours and the prevailing wage rates in cash and kind for the reported working hours are collected sex-wise for each of the 18 selected occupations. The 'kind' part of the wages are evaluated at local retail prices.

COMPILATION OF AVERAGE WAGE RATES

The wage rates are sometimes reported for a duration which is less/more than the normal working hours. In such cases, these are first normalised for eight normal hours working day. In the next stage, the simple arithmetic average of these normalised daily wage rates is worked out for each state as follows:

$$\frac{1}{n} \sum_{i=1}^n W_i$$

Where 'W' represents wage and 'n' number of villages in the State.

Similarly, the average wage rates at all-India level are derived by dividing the sum total of wages of all the 20 States by the number of quotations. State-wise averages have been restricted only to those occupations where the number of quotations are five or more in order to avoid inconsistency in wages paid to different categories of workers on account of difference in number of quotations. However, for working out all-India averages all those neglected quotations have been taken into account to arrive at total number of quotations at all-India level. At all-India level also, the number of quotations for working out occupation-wise averages have been restricted to five or more.

This booklet provides wage rate data for 20 states and all-India in respect of 18 agricultural and non-agricultural occupations for 12 months of the agricultural year 2000-01. The dash (-) in the tables against various occupations indicate that no wage rate was reported during the reference month for various reasons, such as:

- i) the activity connected with the occupation was not undertaken in the state; or
- ii) the activity was out of season in the state; or
- iii) the particular category of workers (i.e. Men/Women/Children) were not engaged in that operation.

EXECUTIVE SUMMARY

The Rural Labour Enquiry provides data on the working and living conditions of agricultural and rural labourers. As a part of this Enquiry, the daily wage rate data in respect of 18 agricultural and non-agricultural occupations are being collected from a fixed set of 600 sample villages spread over 20 States (Andhra Pradesh, Assam, Bihar, Gujarat, Haryana, Himachal Pradesh, Jammu & Kashmir, Karnataka, Kerala, Madhya Pradesh, Meghalaya, Maharashtra, Manipur, Orissa, Punjab, Rajasthan, Tamil Nadu, Tripura, Uttar Pradesh and West Bengal) since 1986-87. The Labour Bureau, however, took up the compilation of wage rate statistics with effect from 1995-96. Occupation and sex-wise wage rates paid in 20 states for the agricultural year 2000-01 have been presented in this booklet. Some of the findings of the data are presented in the following paragraphs.

The analysis of month-wise wage rate data for the agricultural year 2000-2001 (i.e. July,2000 to June,2001) revealed that amongst agricultural occupations, well-digging was observed to be the highest paid occupation for men during the major part of the year. At all-India level, the average wage rate for well-digging was found in the range of Rs.75.17 to Rs. 80.45 during the year 2000-2001. For women, transplanting was the highest paid occupation as the daily wage rate ranged between Rs. 41.59 and Rs.47.38. Similarly, children got highest daily wage rate in transplanting occupation in the range of Rs. 31.66 to Rs. 36.93. On the other hand, the herdsman was noticed to be the lowest paid occupation for men. The all-India average daily wage rate for herdsman occupation (men) ranged between Rs. 35.04 to Rs. 36.88 during the year under reference. Women also got lowest daily wage rates in herdsman occupation. The average daily wage rate for women in this occupation ranged from Rs. 27.54 to Rs. 29.49. Likewise, children received lowest daily wages in herdsman occupation in the range of Rs.23.07 to Rs. 25.35.

Amongst non-agricultural occupations, mason was observed to be the highest paid occupation for men. At all- India level, the average daily wage rate for mason ranged between Rs. 104.31 to Rs.108.78 during the year under report. For women, sweeper was found to be the highest paid occupation with average daily wage rates in the range of Rs.44.72 to Rs. 47.24. Similarly, children got highest wages in the range of Rs. 44.00 to Rs.44.76 in sweeper occupation. On the other hand, sweeper (men) got lowest wages in the range of Rs. 45.29 to Rs.46.18. For women, unskilled labourers was observed to be the lowest paid occupation with wages in the range of Rs.38.81 to Rs.40.87. Likewise, children got lowest daily wages in unskilled labour occupation. The average daily wage rate ranged between Rs. 26.82 to Rs.27.33 in this occupation.

It may be seen from the data that the average daily wage rates paid to male labourers were consistently higher than those of the females in all the occupations. For instance, in ploughing occupation in July,2000, average daily wage rate for men at all-India level was Rs. 63.10 as against Rs. 40.11 for women and Rs. 27.42 for children. Similarly, unskilled labourers received Rs. 54.22 (men), Rs. 40.85 (women) and Rs. 27.26 (children) as average daily wages during June,2001. None of the female workers was observed to be engaged either as carpenter or cobbler or even as tractor driver throughout the year.
