PREFACE

The publication titled "Wage Rates in Rural India", sixth in the series, contains daily wage rates data relating to 18 agricultural and non-agricultural occupations for the agricultural year 2002-03 (July to June). This data is being collected every month from a fixed set of 600 sample villages spread over 66 NSS regions of 20 States along with rural retail prices utilised in the compilation of consumer price index numbers for agricultural and rural labourers.

These wage rates are compiled and released every month and published in our monthly publication "Indian Labour Journal" since April, 1998. An attempt has been made in this publication to present the data for whole of the year at one place. It is also available on the Bureau's website <http://labourbureau.nic.in>.

I hope this publication would be useful to Planners, Policy Makers, Economists, Statisticians, Research Scholars, Organisations of both Public and Private and general public at large.

I place on record my appreciation to the officers/staff of the Wage Rate Section (Annexure II) for their efforts in bringing out this publication in time.

Suggestions for improvement in the quality and contents of this publication are welcome.

METHODOLOGY FOR COMPILATION OF THE WAGE RATE DATA

INTRODUCTION

Rural labour in general and agricultural labour in particular constitutes the weakest segment of our population. About two-third of the total labour force live in rural areas. This segment of the society, unlike their counterparts in the organised sector of industries, does not enjoy the benefits of the labour enactments and the employer-employee relationships. Most of them are casual workers doing day to day work involving frequent changes of employers and there is no fixed pay either. As such information on the living and working condition of this segment of the labour force is very scanty. Rural Labour Enquiries conducted at regular intervals on a quinquennial basis are the only source of reliable information on socio-economic conditions of rural labour. Besides, the Consumer Price Index Numbers for Agricultural and Rural Labourers released every month by the Bureau provide data for the revision and fixation of minimum wages in agriculture.

The Technical Working Group on Rural Retail Prices set up by the NSSO in 1974 to revise/update the series of Consumer Price Index Numbers for Agricultural Labourers felt the need for a regular in-flow of wage data for rural workers for drawing up and implementation of wage policy. This data was also found useful in the calculation of State/National Income as well as in the assessment of cost of cultivation of crops. In view of its vital importance, the Group suggested to collect the wage rate of large set of occupations from a suitable selected sample of villages in various states so that a fairly representative picture of wage situation is available for the entire country on a continuous basis. It was also felt that since prices and wages are related to each other it would be useful if the trend of these two characteristics were available on the basis of same coverage. In pursuance of these recommendations of the Group, the wage rate data on eleven agricultural and seven non-agricultural occupations entailing manual work are being collected along with rural retail prices as a part of the scheme of Rural Labour Enquiry, from 600 sample villages spread over 20 states in the country since July, 1986 with the following objectives:

- i) meeting the requirements of complementary data for enforcement of minimum wages fixed/revised by the Government;
- ii) meeting the requirements of drawing up and implementation of Wage Policy; and
- iii) meeting the requirements in estimation of State Domestic Product/National Income and Cost of Cultivation studies.

However, the compilation of wage rate-data was deferred for some time due to some problems relating to the veracity of data with reference to the purpose for which it was being collected. During the year 1995, the Governing Council of the National Sample Survey Organisation sorted out the problem and recommended that wage rate data should continue to be collected and published every month. In pursuance of the recommendation of the Council, the Labour Bureau took up the work of compiling wage rate data since the agricultural year 1995-96. These data are now being compiled on regular monthly basis and published in our monthly publication, the **Indian Labour Journal**, w.e.f. April, 1998.

SAMPLE SIZE

As stated earlier, the rural retail prices and wage rates are collected from the same set of sample villages. Therefore, the state-wise sample villages were decided by the Working Group as per the need for constructing the CPI No's for Agricultural/ Rural Labourers. The state-wise distribution of the number of regions, strata and sample villages is given below:

Sl.No.	State	Region	Strata	Sample village
1	Andhra Pradesh	4	18	54
2	Assam	3	8	27
3	Bihar	3	13	39
4	Gujarat	5	10	30
5	Haryana	2	4	12
6	Himachal Pradesh	1	3	9
7	Jammu & Kashmir	3	5	21
8	Karnataka	4	11	36
9	Kerala	2	5	21
10	Madhya Pradesh	7	23	69
11	Maharashtra	6	18	54
12	Manipur	2	2	9
13	Meghalaya	1	2	9
14	Orissa	3	8	33
15	Punjab	2	5	15
16	Rajasthan	4	7	21
17	Tamil Nadu	4	11	33
18	Tripura	1	3	9
19	Uttar Pradesh	5	20	60
20	West Bengal	4	11	39
Total		66	187	600

COLLECTION OF WAGE RATE

The work of data collection has been entrusted to the Field Operations Division of the National Sample Survey Organisation. The wage rate data are being collected every month along with rural retail prices from 600 sample villages spread over 66 NSS regions of 20 States by canvassing Block-5 (Annexure-1) of Schedule 3.01(R). Collection of data from these sample villages is staggered over the four weeks of a month with one-fourth of them being covered every week. The days of canvassing of Schedule 3.01(R) are fixed. The village functionaries like the Panchayat Secretary, Progress Assistant, Patwari and other Village or Block Officials are the primary informants for collection of data on wage rates. The data on normal working hours and the prevailing wage rates in cash and kind for the reported working hours are collected sex-wise for each of the 18 selected occupations. Payments in kind is very common in rural areas, which include food grains, cooked meal, fuel, tea, cigarettes, bidi, todder, etc. Wages in kind are evaluated at local retail prices.

The selected occupations for which daily wage rates are being collected every month are as follows:

Agricultural Occupations

- 1 Ploughing
- 2 Sowing
- 3 Weeding
4. Transplanting
5. Harvesting
6. Winnowing
7. Threshing
8. Picking
- 9 Herdsman
10. Well Digging
11. Cane Crushing

Non-agricultural Occupations

1. Carpenter
2. Blacksmith
3. Cobbler
4. Mason
5. Tractor Driver
6. Sweeper
7. Unskilled Labour (un-specified)

COMPILATION OF AVERAGE WAGE RATES

The data received from the field is first posted separately for agricultural and non-agricultural occupations for each state every month. Wage rates are sometimes reported for a duration that is less/more than the normal working hours. In such cases, they are first normalised for eight hours working day. Thereafter, data is thoroughly scrutinised and

discrepant points are referred back to the field for clarification. In the next stage, the simple arithmetic average of these normalised daily wage rates is worked out for each state as follows:

$$\frac{1}{n} \sum_{i=1}^n W_i$$

Where 'W' represents wage and 'n' number of villages in the State.

Similarly, the average wage rates at all-India level are derived by dividing the sum total of wages of all the 20 States by the number of quotations. State-wise averages have been restricted only to those occupations where the number of quotations are five or more in order to avoid inconsistency in wages paid to different categories of workers on account of difference in number of quotations. However, for working out all-India averages all those neglected quotations have been taken into account to arrive at total number of quotations at all-India level. At all-India level also, the number of quotations for working out occupation-wise averages have been restricted to five or more.

The present publication provides wage rate data in respect of 18 agricultural and non-agricultural occupations for 20 states and all-India for the agricultural year 2002-03. The dash (-) in Tables against various occupations indicate that no wage rate was reported during the reference month for various reasons, such as:

- i) the activity connected with the occupation was not undertaken in the State; or
- ii) the activity was out of season in the State; or
- iii) the particular category of workers (i.e. Men/Women/Children) were not engaged in that operation.

SUMMARY

In pursuance of the recommendations of the Technical Working Group on Rural Retail Prices set by the NSSO in 1974, the wage rate data in respect of 18 agricultural and non-agricultural occupations are being collected every month along with rural retail prices in Schedule 3.01(R) from a fixed set of 600 sample villages spread over 66 N.S.S. regions of 20 States (Andhra Pradesh, Assam, Bihar, Gujarat, Haryana, Himachal Pradesh, Jammu & Kashmir, Karnataka, Kerala, Madhya Pradesh, Meghalaya, Maharashtra, Manipur, Orissa, Punjab, Rajasthan, Tamil Nadu, Tripura, Uttar Pradesh and West Bengal) since July, 1986. These data are being compiled and published w.e.f. the agricultural year 1995-96. In this booklet, daily wage rates for 20 States and All-India have been presented, occupation and sex-wise, for the agricultural year 2002-03 (July to June). The main findings of the data are summarised below:

a) Agricultural occupations:

1. All-India annual average daily wage rates in different agricultural occupations during the year 2002-03 varied widely from Rs.40.36 for male herds-keepers to Rs.83.31 for male labour engaged in 'well-digging'; from Rs.31.60 for female herds-keepers to Rs.48.24 for the female engaged in 'transplanting' activities; and from Rs.25.33 for child herds-keepers to Rs.35.69 for those employed in 'weeding'.

2. Amongst agricultural occupations, 'well digging' was observed to be the highest paid activity for men followed by 'ploughing' and 'sowing' occupations. During the year 2002-03, the all-India average daily wage rates in 'well digging' varied from Rs.81.14 in July, 2002 to Rs.85.00 in February, 2003. It was noticed that the average wage rates for men in 'well digging' was the highest in the state of Kerala and the lowest in the state of Madhya Pradesh throughout the year.

3. 'Transplanting' occupation fetched maximum wages for women followed by 'harvesting' and 'threshing' occupations. The all-India average daily wage rates for women in 'transplanting' occupation ranged between Rs.46.54 in September, 2002 to Rs.49.77 in June, 2003.

4. Children got highest wages in 'weeding' occupation in the range of Rs.33.49 in December, 2002 to Rs.38.81 in June, 2003 followed by 'cane crushing' and 'transplanting' occupations.

5. For all the three categories of workers i.e. men, women and children, 'Herds-keeping' was observed to be the least remunerative occupation as the annual average daily wage rates were as low as Rs.40.36, Rs.31.60 and Rs.25.33 respectively during the year 2002-03.

b) Non-agricultural occupations:

6. The all-India annual average daily wage rates in non- agricultural occupations also varied widely from Rs.50.08 for male 'sweepers' to Rs.116.34 for male 'masons'; from Rs.41.86 for female 'mason' to Rs.49.74 for female 'sweepers'; and Rs.29.19 for 'unskilled child labour'.

7. Amongst non-agricultural occupations, 'masonry' was observed to be the highest paid occupation for men followed by 'carpentry' and 'blacksmithy' occupations. During the year 2002-03, the all-India average daily wages for male 'masons' ranged between Rs.114.97 in July, 2002 to Rs.117.63 in June, 2003.

8. 'Sweeping' was the highest paid occupation for women as their all-India average daily wages in that occupation varied from Rs.47.15 in October, 2002 to Rs.51.15 in March, 2003.

9. During the year 2002-03, the all-India average daily wages of children engaged as 'unskilled labourers' ranged between Rs.28.46 in July, 2002 to Rs.29.77 in February, 2003.

10. 'Sweeping' was found to be the lowest paid occupation for men during the year under reference with an all-India average daily wage rate of Rs.50.08. For women, 'Masonry' was observed to be the lowest paid occupation with an average daily wage rate of Rs.41.86.

11. The average daily wage rates for women were found to be generally lower than those for men in most of the occupations. These can be attributed to variations in the number of quotations as no wage differential based on sex was observed at sample village level.

12. None of the female workers were found employed either as 'carpenters', or 'blacksmiths', or 'cobblers' or as 'tractor drivers' as no wage rate was reported for these occupations during the year.
