

**Report on
Youth
Employment-Unemployment
Scenario**

(2012-13)

Volume III

सत्यमेव जयते

**GOVERNMENT OF INDIA
MINISTRY OF LABOUR & EMPLOYMENT
LABOUR BUREAU
CHANDIGARH**

Foreword

The World is facing a worsening youth employment crisis as per the recent Report on Youth 2013 released by International Labour Organization (ILO). ILO has estimated that nearly 75 million youth were unemployed around the world and global youth unemployment rate is projected at 12.6 per cent.

Social, Economic and Demographic changes in the last two decades coupled with globalization and technological advances have significantly impacted the labour markets in India also. As a consequence to these changes, a number of issues, which were hitherto not part of serious policy discourse, have emerged. One of the critical aspects of employment policy is emergence of large pool of young people who as new workers, face a number of challenges associated with the evolving economic and social structure.

From the Third Annual Employment-Unemployment Survey a beginning has been made to assess the size, structure, characteristics, outputs and contributions of the youth in the labour market and how these parameters differ from the other age groups. In the current report a first step has been taken to estimate employment structure of various age groups 15-24 years, 18-29 years and 15-29 years to assess the extent of unemployment, broad activity by educational qualifications and kind of activities the youth are pursuing across different states.

I hope the report will prove to be an important input for the policymakers to draft/review the policies particularly related to the youth so that the demographic dividend which our country has is transmitted into economic and social prosperity.

EXECUTIVE SUMMARY

- The present report is based on the Third Annual Employment-Unemployment Survey 2012-13 conducted by Labour Bureau.
- The current Volume deals with the "Youth Employment-Unemployment Scenario" 2012-2013 in the country.
- The survey has been conducted in all the States/UTs by covering all the districts.
- The field work executed from October, 2012 to May, 2013.
- A total sample of 1,33,354 households has been covered with a break up of 82,624 households in the rural sector and 50,730 households in the urban sector.
- The labour force estimates for specific age groups representing "Youth" based on all the four approaches have been derived. The four approaches are usual principal status (UPS) approach, usual principal and subsidiary status (UPSS) approach, current weekly status (CWS) approach and current daily status (CDS) approach.
- Majority of the labour force related tables generated in the report are state-wise/gender-wise/sector-wise.
- Based on the survey results, Labour Force Participation Rate (LFPR) which signifies labour supply in the country for different age groups by different approaches is as follows:

(in per cent)

Approach	15-24 Year	18-29 Year	15-29 Year
UPS	31.2	47.3	39.5
UPSS	33.2	49.4	41.5
CDS	30.7	46.1	38.6
CWS	32.0	47.7	40.1

- The Worker Population Ratio which signifies the proportion of workers/employed persons in the total population for different age groups by different approaches is as follows:

(in per cent)

Approach	15-24 Year	18-29 Year	15-29 Year
UPS	25.5	41.2	34.2
UPSS	28.1	44.0	36.9
CDS	25.4	40.2	33.6
CWS	26.9	42.2	35.3

- The Unemployment Rate for different age groups by different approaches is as follows:

(in per cent)

Approach	15-24 Year	18-29 Year	15-29 Year
UPS	18.1	13.0	13.3
UPSS	15.3	11.0	11.3
CDS	17.2	12.7	13.0
CWS	16.0	11.7	12.0

- Based on the survey results, majority of the persons employed are either self employed or casual worker.
- Based on usual principal status approach for the age group 15-29 years, 41.3 per cent employed persons are self employed followed by 34.7 per cent under casual worker category and remaining 24.0 per cent under wage/salaried employee and contract category worker classification.
- The survey results show that with increase in education level, the unemployment rate is also increasing for all age groups viz. 15-24 years, 18-29 years and 15-29 years.

- Every 1 person out of 3 persons who is holding a degree in graduation and above is found to be unemployed based on the survey results under the usual principal status approach for the age group 15-29 years.
- In rural areas the unemployment rate among graduates and above for the age group 15-29 years is estimated to be 36.6 per cent whereas in urban areas the same is 26.5 per cent.
- The unemployment rate among the persons who can't read and write any language or are considered as "not literate" as per the survey is lowest with 3.7 per cent for the age group 15-29 years at All India level.

CHAPTER-I

INTRODUCTION

Youth Employment- Challenges and Opportunities

1.1 The World is facing a worsening youth employment crisis as per the recent **Report on Youth 2013** released by International Labour Organization (ILO). ILO has estimated that nearly 75 million youth are unemployed around the world and global youth unemployment rate is projected at 12.6 per cent. The Report further suggests that in comparison with adults, youth continue to be almost three times as likely to be unemployed, and unemployment rates affect them disproportionately. The prolonged job crisis also forces the current generation of youth to be less selective about the type of job they are prepared to accept. A large number of youth is now turning to be available for part-time jobs or find themselves stuck in temporary employment.

1.2 The impact of Youth Employment Crisis in the world is visible in our country also based on the Third Annual

Employment-Unemployment Survey results. Based on current survey results, the unemployment rate among youth is significantly high as compared to the adult population. The matter of concern is educated youth who is finding it difficult to get employment opportunities based on survey findings. For every 1 person out of 3 persons who are graduate and above is found to be unemployed under the age group of 15-29 years. Longer search for job increases unrest among the youth and is not conducive for economic and social upliftment of the society.

1.3 As per the findings of the 'State of the Urban Youth, India 2012: Employment, Livelihoods, Skills,' a report published by IRIS Knowledge Foundation in collaboration with UN-HABITAT, India is set to experience a dynamic transformation as the population burden of the past turns into a demographic dividend, but the benefits will be tempered with social and spatial inequalities.

1.4 The report traces the incredible rise — and the eventual decline — of this cohort in India. The population in the age-group of 15-34 increased from 353 million in 2001 to 430 million in 2011. Current predictions suggest a steady increase in the youth population to 464 million by 2021 and finally a decline to 458 million by 2026.

1.5 Social, economic and demographic changes in the last two decades coupled with globalization and technological advances have significantly impacted the labour markets in India. As a consequence to these changes, a number of issues, which were hitherto not part of serious policy discourse, have emerged. One of the critical aspects of employment policy is emergence of large pool of young people who as new workers, face a number of challenges associated with the evolving economic and social structure. Skills mismatch on youth labour markets has become a persistent and growing trend. Over-education and over-skilling coexist with under-education and under-skilling and increasingly with skills brought about by long term unemployment. **Young people in**

employment are actually overqualified for the job they are doing and therefore society is losing their valuable skills and forfeiting stronger productivity growth that would have been achieved, had these young people been employed at their appropriate level of qualification.

1.6 In the current survey, a beginning has been made to assess the size, structure, characteristics, outputs and contributions of the youth in the labour market and how these parameters differ from the other age groups. During the third survey, first step has been taken to estimate employment structure of various age groups 15-24 years, 18-29 years and 15-29 years to assess the extent of unemployment, broad activity by educational qualifications and kind of activities the youth are pursuing across different States/UTs.

Demographic Dividend

1.7 Demographic dividend refers to a trend that leads to a larger proportion of population in the working age group compared to younger and old age groups. By 2020, India is set to become the world's youngest country with **64 per cent of its population** in the working age group. With the West, Japan and even China aging, this demographic potential offers

India and its growing economy an unprecedented edge that economists believe could add a **significant 2 per cent to the GDP growth rate**. Based on the experience of relatively advanced economies, it is generally accepted that demographic dividend can contribute to significantly higher economic growth rates provided economic opportunities matching the requirements of the economy and aspirations of new entrants in the labour force are generated. Recognizing this as a challenge as well an opportunity, the Twelfth Plan strategy hinges on improving the employability of young labour force through skill development and creating high value employment in primary and secondary sectors.

Trends in Youth Employment

1.8 There are presently no authentic sources of the youth employment characteristics in India. The anecdotal references and macro trends seem to suggest that new opportunities tend to cluster at the top end in the professional and advanced technical sectors (Auto, Steel, Energy, Information Technology, Bio technology, Machinery etc) and at the bottom end in low-tier service industry (Call Centers, Service Executives, Marketing,

fast food industry and Maintenance Services etc). Decline in skilled jobs in manufacturing sector together with increased demand for professional specialists and unskilled jobs in secondary and tertiary sector has led to a situation where a large segment of youth either do not possess the requisite skills and experience for the new opportunities or are employed on part-time and temporary contract basis. This apparent casualisation of job is pushing young people to informal sectors which are characterized by insecurity and less than satisfactory working conditions. Mushrooming of large number of unregulated private institutes conferring technical degrees and diplomas unsuited to the job demands of modern economy has further aggravated the situation as more and more youth are forced to accept informal and inferior forms of employment, particularly in rural areas.

1.9 In the absence of proportionate growth in job opportunities in manufacturing and services sector and availability of insufficient number of jobs coupled with prevailing mismatch between education and job opportunities,

self-employment is the only option for youth and the current survey confirms this assertion. Based on the survey results, majority of the persons are either self employed or casual labour. International experience suggests that entrepreneurship requires some business acumen and entrepreneurial spirit. These attributes cannot necessarily be acquired through training. Also given the high rate of failure of small businesses, self-employment as a last resort cannot be a long-term prescription for sustainable employment for youth. In the interim, though self-employment would continue to be a part of an integrated youth employment policy, strategies to promote self-employment have conventionally relied on providing managerial and marketing skills and improving access to credit and infrastructure improvement. Youth lack business experience and have limited resources to offer collaterals and are therefore considered high-risk borrowers. New initiatives are needed in form of special credit funds and subsidies to encourage youth entrepreneurship and enable

easy access to capital for providing gainful employment to the large segment of youth who are otherwise not able to find employment in formal sector.

1.10 For the unskilled and semi-skilled category of persons, Government has traditionally relied on public works projects to enhance employment opportunities. These projects, primarily concentrated in road building, irrigation and maintenance sector, are designed to meet the twin objective of developing infrastructure and providing employment at minimum wages. With the general rise in education levels and aspirations, the attractiveness of these manual labour programmes devoid of any equipment support needs to be examined. The ambit of these programmes needs to be revisited to include social services which enhance the self-esteem of youth. Programmes such as adult education, sports management, environment improvement, elderly care etc, offer a more respectable and acceptable options to the youth.

CHAPTER-II

TRENDS IN YOUTH SCENARIO

Introduction

2.1 There is no unique definition of specific age group which refers to youth in the country. Therefore, the results in the report are compiled for different age groups viz. 15-24 years, 18-29 years and 15-29 years keeping in view the requirements of various users/stakeholders. As the results of various labour force parameters are presented in the main volume in proportions only, the results of all the labour force parameters and its derivatives of specific age groups are also presented in the form of proportions (or out of 000) in the current volume. In order to derive the absolute figures, the proportions may be multiplied with the corresponding population figure of same age-group/sector/ gender. The

concepts and definitions for measuring various labour force parameters by different approaches, activity status etc. are already explained in detail in Volume-I. However, for reference, again the concepts and definitions are enclosed in Annexure.

Labour Force Participation Rate (LFPR)

2.2 The LFPR represents the supply of labour in the country. This may be defined as the number of persons who are either working or seeking/available for work during the reference period. The results are compiled for different age groups namely 15-24 years, 18-29 years and 15-29 years by Gender/Sector/State/UT wise based on all the four approaches.

Table 2.1: LFPR for different age groups (in '000) by different approaches

Approach	15-24 Year			18-29 Year			15-29 Year		
	M	F	P	M	F	P	M	F	P
UPS	441	154	312	698	218	473	574	186	395
UPSS	455	181	332	707	253	494	585	218	415
CDS	426	161	307	672	222	461	554	191	386
CWS	438	175	320	685	242	477	567	208	401

2.3 At National level, the Labour Force Participation Rate for the age group 15-29 is maximum with 415 persons out of 1000 persons based on usual principal & subsidiary status approach followed (UPSS) by 401 persons under the current weekly status approach (CWS) , 395 persons under usual principal status approach (UPS) and 386 persons under the current daily status (CDS) approach. As

evident from the table, female labour force participation rate is relatively low as compared to male labour force participation rate based on all the four approaches. Under the UPSS approach, female LFPR which is highest among all the four approaches is 218 persons out of 1000 persons, whereas for male category of persons, the LFPR is estimated to be 585 persons out of 1000 persons under the UPSS approach.

LFPR for different age groups (in 000) by different approaches

Worker Population Ratio (WPR)

2.4 The another important parameter in the labour force survey is Worker Population Ratio which signifies the proportion of workers/employed

persons in the total population. Based on all the four approaches the worker population ratio for different age groups is as follows:

Table 2.2: WPR for different age groups (in 000) by different approaches

Approach	15-24 Year			18-29 Year			15-29 Year		
	M	F	P	M	F	P	M	F	P
UPS	369	116	255	620	177	412	507	150	342
UPSS	392	146	281	638	215	440	526	185	369
CDS	358	127	254	596	183	402	489	158	336
CWS	373	141	269	615	203	422	506	175	353

WPR for different age groups (in 000) by different approaches

2.5 Similar type of trends as seen in the LFPR is observed in the Worker Population Ratio also. A maximum WPR of 369 persons out of 1000 persons is

observed in the usual principal and subsidiary status approach followed by 353 persons under the current weekly status approach, 342 persons under

the usual principal status approach and 336 persons under the current daily status approach. While comparing the gender wise WPR, similar type of results as obtained under LFPR is visible with highest WPR for females under UPSS approach (185 persons out of 1000 persons) whereas for male category of persons, the WPR is estimated to be 526 persons out of 1000 persons under the UPSS approach.

Unemployment Rate (UR)

2.6 The another important parameter is the unemployment rate. The unemployment rate signifies the proportion of persons who are available for work but didn't get work out of labour force during the reference period. Based on all the four approaches the unemployment rate for different age groups is as follows.

Table 2.3: UR for different age groups (in 000) by different approaches

Approach	15-24 Year			18-29 Year			15-29 Year		
	M	F	P	M	F	P	M	F	P
UPS	163	244	181	113	191	130	117	191	133
UPSS	139	194	153	97	152	110	100	152	113
CDS	159	211	172	113	174	127	117	173	130
CWS	148	196	160	103	160	117	108	159	120

2.7 Based on the usual principal status approach, the unemployment rate at All India level is 133 persons out of 1000 persons for the age group 15-29 years which is maximum among all the other approaches. In other words, the unemployment rate is estimated to be 13.3 per cent for the age group 15-29 years at All India level. In case of current daily status

approach, the unemployment rate is estimated to be 13.0 per cent at All India level for the age group 15-29 years followed by 12.0 per cent under current weekly status approach and 11.3 per cent under UPSS approach for the age group of 15-29 years.

2.8 While comparing gender wise unemployment rate at All

India level under the usual principal status approach for the age group 15-29 years, it may be seen that there is wide variation among the male-female unemployment rate. In case of females, the unemployment rate is estimated to be 191 persons out of 1000 persons or 19.1 per cent

whereas for male the same is 117 persons out of 1000 persons or 11.7 per cent. There are twin issues for female participation in the Labour Force (i) Lower Labour Force Participation rate and (ii) High Unemployment Rate. Based on all the four approaches similar type of trends are visible.

UR for different age groups (in 1000) by different approaches

Activity Wise Distribution of Persons

2.9 The employed persons are further classified based on the activity pursued by them during the reference period viz. self

employed, wage/ salaried employees, contract worker and casual worker based on usual principal status approach for different age groups.

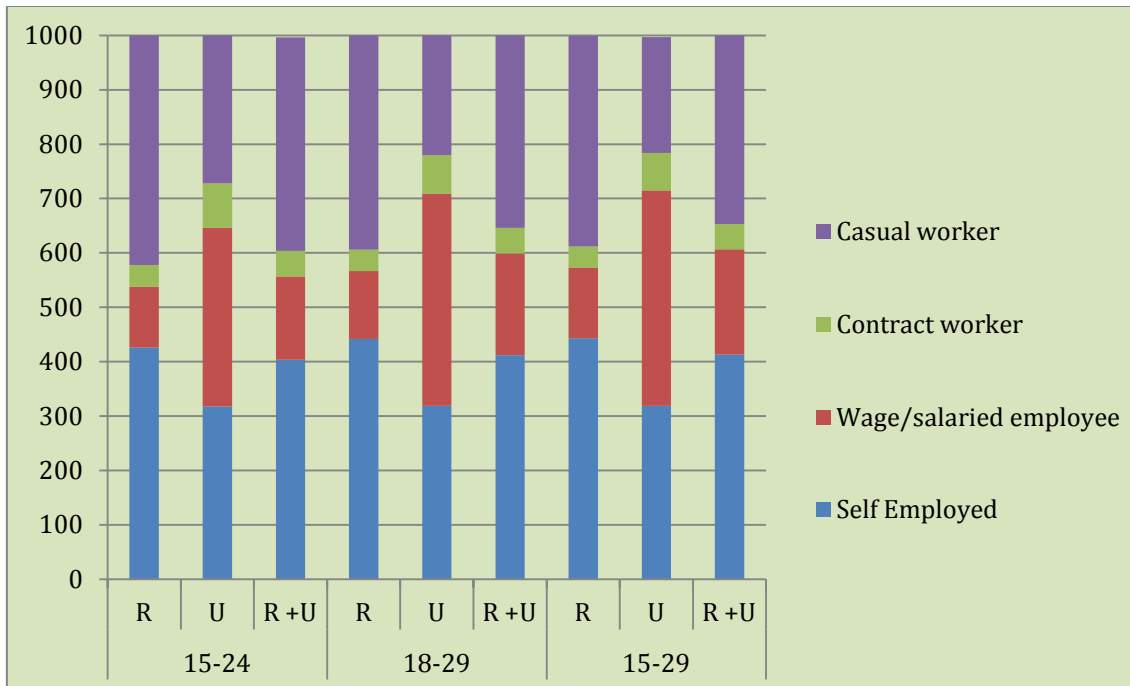

Table 2.4: Activity Wise distribution of workers (in 000) by different age groups

Activity	15-24 Year			18-29 Year			15-29 Year		
	R	U	R+U	R	U	R+U	R	U	R+U
Self Employed	426	318	404	442	319	412	443	319	413
Wage/salaried employee	112	328	153	125	390	187	130	396	194
Contract worker	40	82	47	39	71	47	39	69	46
Casual worker	422	277	392	394	220	354	387	213	347

R-Rural; U-Urban

2.10 It may be seen from above table that majority of the persons are either self employed or casual worker for all the age groups. While analyzing the results under 15-29 years of age group, it is evident that 413 persons out of 1000 persons are

self employed followed by 347 persons under casual workers classification, 194 persons under wage/salaried employee category and remaining 46 persons under the contract worker classification at All India level (or Rural + Urban).

Activity Wise distribution of workers (in 000)

2.11 While comparing the results for urban sector under the age group of 15-29 years, it may be seen that wage/salaried employees are maximum with 396 persons out of 1000 persons followed by 319 persons under the self employed classification, 213 persons under the casual worker category and remaining 69 persons under the contract

worker category at All India level.

Distribution of persons based on National Industrial Classification 2008

2.12 The employed persons for various age groups compiled in the report are further classified based on NIC 2008 classification at one digit level. The following sections are merged to present the results at one digit level.

Table 2.5: Section Wise details of NIC 2008

Section	Details	Code
Section A	Agriculture, forestry and fishing	Code 1
Section B	Mining and quarrying	Code 2
Section C	Manufacturing	Code 3
Section D	Electricity, gas, steam and air conditioning supply	Code 4
Section E	Water supply; sewerage, waste management and remediation activities	Code 4
Section F	Construction	Code 5
Section G	Wholesale and retail trade; repair of motor vehicles and motorcycles	Code 6
Section H	Transportation and storage	Code 6
Section I	Accommodation and Food service activities	Code 6
Section J	Information and communication	Code 6

Section K	Financial and insurance activities	Code 7
Section L	Real estate activities	Code 7
Section M	Professional, scientific and technical activities	Code 7
Section N	Administrative and support service activities	Code 7
Section O	Public administration and defence; compulsory social security	Code 8
Section P	Education	Code 8
Section Q	Human health and social work activities	Code 8
Section R	Arts, entertainment and recreation	Code 8
Section S	Other service activities	Code 8
Section T	Activities of households as employers; undifferentiated goods and services producing activities of households for own use	Code 9
Section U	Activities of extraterritorial organizations and bodies	Code 9

2.13 The survey results are compiled for the age group of 15-24 years, 18-29 years and 15-29 years. Based on the survey findings, majority of the persons are employed under the Code 1 classification or Agriculture, forestry and fishing section based on usual principal status approach.

2.14 It may be observed from the above table that in all the three age groups, a maximum number of persons are found to be employed under Agriculture, forestry & fishing sector. In construction & manufacturing sector also a significant number of persons are found to be employed based on the survey results under the usual principal status approach.

Table 2.6: Distribution of workers by NIC 2008 (in 1000) based on Usual Principal Status Approach by different age groups

Code	<i>Rural +Urban</i>		
	15-24 Year	18-29 Year	15-29 Year
Code 1	467	435	443
Code 2	7	6	6
Code 3	140	131	132
Code 4	5	6	5
Code 5	137	125	126
Code 6	147	167	163
Code 7	26	39	37
Code 8	64	84	81
Code 9	7	7	7

Distribution of workers by NIC 2008 (in 000)

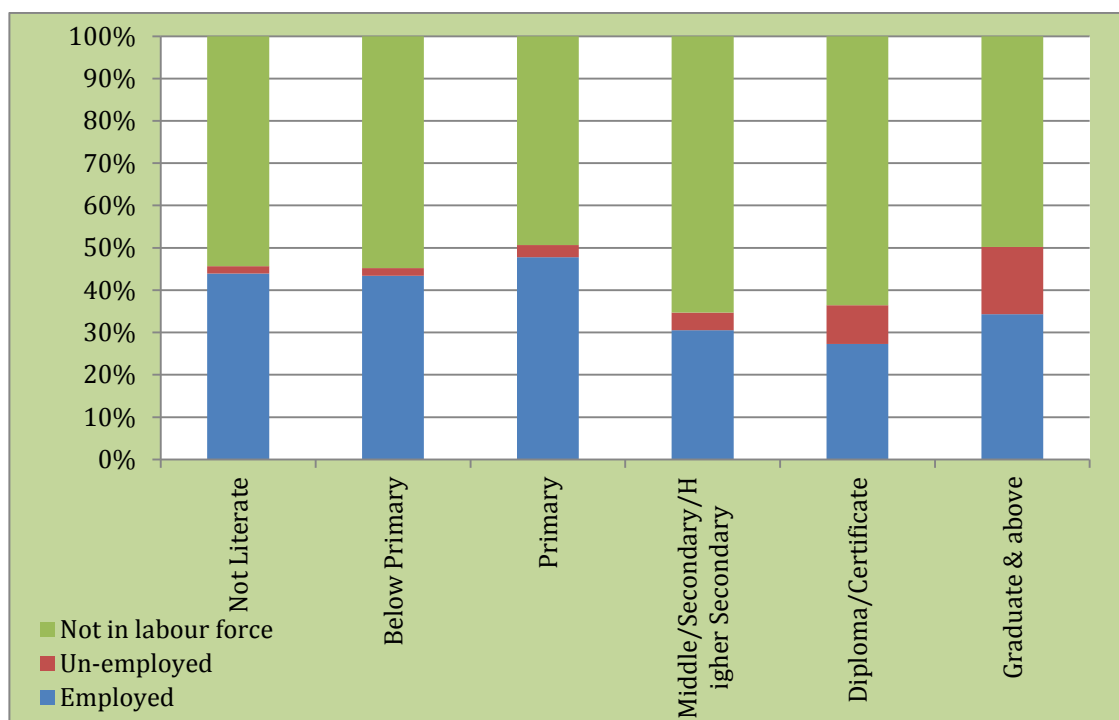

Education Wise classification of persons

2.15 In the report, persons by education are also classified based on the main activity pursued by them during the reference period viz. employed,

unemployed and not in labour force for different age groups. These tables are generated for rural + urban, rural and urban category for all the States/UTs/All India level for different age groups.

Table 2.7: Distribution of persons by educational classification (in 000) based on Usual Principal Status Approach for the age group 15-29 years

Educational Classification	Employed	Un-employed	Not in labour force
Not Literate	440	17	544
Below Primary	434	18	548
Primary	478	29	494
Middle/Secondary/Higher Secondary	305	42	653
Diploma/Certificate	273	91	636
Graduate & above	343	159	498

Distribution of persons by educational classification (in 000)

2.16 The results are segregated for not literate, below primary, primary, middle/secondary/higher secondary, diploma/ certificate and graduate & above classification.

increasing, the unemployment rate is also increasing. In case of graduates & above, the unemployment rate is significantly high at 32 per cent for the age group of 15-29 years category

2.17 It may be seen from the table that as the education level is

CONCEPTS AND DEFINITIONS

Important concepts and definitions used in the survey and relevant to this report are explained below.

2.1 House: Every structure, tent or other place of shelter, etc. which is used primarily for residential use is considered as a house for the present survey.

2.2 Household: A group of persons normally living together and taking food from a common kitchen will constitute a household. It will include temporary stay-aways (those whose total period of absence from the household is expected to be less than 6 months) but exclude temporary visitors and guests (expected total period of stay less than 6 months). The members of a household may or may not be related by blood or marriage to one another. The following examples may be useful while determining the group of persons to be considered as households:

- (a) In case a hostel is listed, it will constitute a single household.
- (b) Inmates of hotel, lodging and boarding house etc. will also constitute a single household.
- (c) In deciding the composition of a household, more emphasis is to be placed on 'normally living together' than on ordinarily taking food from a common kitchen. In case the place of residence of a person is different from the place of boarding, he or she will be treated as a member of the household in which he or she resides.
- (d) A resident employee, or domestic servant or a paying guest will be considered as a member of the household in which he or she resides even though he or she is not a member of the same family.
- (e) In case a member of a family (say a son or a daughter of the head of family) stays elsewhere say in hostel for studies or for any other reason, he/she will not be considered as a member of his/her parents household. However,

he/she will be listed as a member if the hostel is listed.

2.3 Household size: The number of members normally residing in a household is its size.

2.4 Household type: The household type based on the means of livelihood of a household is decided on the basis of the major sources of the household's income during the reference period. For this purpose, only the household's net income from economic activities is to be considered. The income of the servants and paying guests are not to be taken into account while deciding the household type.

2.5 In rural areas, a household may belong to any of the following six household types:

- i. Self-employed in agriculture;
- ii. Self-employed in non-agriculture ;
- iii. Regular wage/salary earning;
- iv. Agricultural labour;
- v. Other labour;
- vi. Others.

2.6 For urban areas, a household may belong to any one of the following four household types:

- i. Self-employed;

- ii. Regular wage/salary earning;
- iii. Casual labour;
- iv. Others.

2.7 Economic activity: The entire spectrum of human activity falls into two categories: i) economic activity and ii) non-economic activity. Any activity that results in production of goods and services which adds value to the national product is considered as an economic activity. Further the economic activities have two parts namely i) market activities and ii) non-market activities. Market activities are those that involve remuneration to those who perform it, i.e., activity performed for pay or profit. Such activities include production of all goods and services for market including those of government services, etc. On the other hand non-market activities are those involving the production of primary commodities for own consumption and own account production of fixed assets.

2.8 Thus the term 'economic activity' in the present Third Annual Employment and Unemployment survey includes:

- i. All the market activities described above, i.e., the activities performed for pay or profit which result in production of goods and

- services for exchange,
- ii. Of the non-market activities,
 - a) All the activities relating to the primary sector which result in production (including free collection of uncultivated crops, forestry, firewood, hunting, fishing, mining, quarrying, etc.) of primary goods for own consumption.
 - b) The activities relating to the own-account production of fixed assets. Own account production of fixed assets include construction of own houses, roads, wells, etc., and of machinery, tools, etc., for household enterprise and also construction of any private or community facilities free of charge. A person may be engaged in own account construction in the capacity of either a labour or a supervisor.

2.9 Activity status: It is the activity in which a person is engaged during the reference period, which in turn decides the person's participation in economic and /or non-economic activities. According to this, a person will be in one or a combination of the following three statuses during a reference period:

- i. Working or engaged in economic activity (work);
- ii. Not engaged in economic activity (work) but either making tangible efforts to seek 'work' or being available for 'work' in case the 'work' is available and
- iii. Neither engaged in any economic activity (work) nor available for 'work'.

2.10 Activity statuses mentioned against sl. no. (i) & (ii) above, are associated with 'being in labour force' and the last sl.no. (iii) is associated with 'not being in the labour force'. Being in labour force is further categorized into two parts (i) employed and unemployed.

2.11 The three broad activity statuses have been further sub-divided into the following categories as listed below:

- i. working or being engaged in economic activity (employed):
 - a) worked in household enterprise (self-employed) as an own-account worker other than home based worker;
 - b) worked as an home based own account worker;

- c) worked in household enterprise as an employer;
- d) worked in household enterprise as 'helper';
- e) worked as an home based paid worker;
- f) worked as regular salaried/wage employee;
- g) worked on contract basis;
- h) worked as casual wage labour in public works other than Mahatma Gandhi National Rural Employment Guarantee (MGNREGA) Act;
- i) worked as casual wage labour in MGNREGA works;
- j) worked as casual wage labour in other types of works;
- k) engaged in household enterprise but could not work during reference period due to sickness;
- l) engaged in household enterprise but could not work during reference period due to other reasons;
- m) did not work due to sickness but had regular wage/salaried employment;
- n) did not work due to other reasons but had regular wage/salaried employment;
- ii. not working but seeking or available for work (unemployed);
- iii. neither working nor available for work (not in labour force)
 - i) attended educational institution;
 - ii) attended domestic duties only;
 - iii) attended domestic duties and was also engaged in free collection of goods, tailoring, weaving, etc. for household use;
 - iv) recipients of rent, pension, remittance, etc;
 - v) not able to work due to disability;
 - vi) prostitutes, beggars, etc;
 - vii) did not work due to sickness (for casual workers only);
 - viii) others.

2.12 The various categories like, 'workers', 'unemployed', labour force, out of labour force are as explained below:

2.13 Workers (or employed):

Persons who during the reference period are engaged in any economic activity or who, despite their attachment to their economic activity, have

temporarily abstained from work, for reasons of illness, injury or other physical disability, bad weather, festivals, social or religious functions or other contingencies necessitating temporary absence from work constitute workers. Unpaid helpers who assist in the operation of an economic activity in the household, farm or non-farm activities are also considered as workers.

2.14 Seeking or available for work (or unemployed): Persons, who owing to lack of work, had not worked but either sought work through employment exchanges, intermediaries, friends or relatives or by making applications to prospective employers or expressed their willingness or availability for work under the prevailing condition of work and remuneration are considered as those who are 'seeking or available for work' (or unemployed).

2.15 Labour force: Persons who are either 'working' (employed) or 'seeking or available for work' (unemployed) or both during a major part of the reference period, constitute the labour force.

2.16 Out of labour force: Persons who are neither 'working' and at the same time nor 'seeking or available for work' for various reasons during the major part of the reference period are considered to be 'out of the labour force'. The persons under this category includes students, persons engaged in domestic duties, rentiers, pensioners, recipients of remittances, those living on alms, infirm or disabled persons, too young or too old persons, beggars, prostitutes, etc.

2.17 It may be noted that workers have been further categorized as self-employed, regular salaried/wage employee and casual wage labour. The details of these categories are defined in the following paragraphs.

2.18 Self-employed: Persons who operate their own farm or non-farm enterprises or are engaged independently in a profession or trade on own-account or with one or a few partners are considered as self-employed. The essential feature of the self-employed is that they have autonomy (i.e., regarding how, where and when to produce) and economic independence (i.e., regarding market, scale of operation and

money) for carrying out operation. The fee or remuneration received by them consists of two parts - the share of their labour and profit of the enterprise. In other words, their remuneration is determined wholly or mainly by sales or profits of the goods or services which are produced.

2.19 The self-employed persons may again be categorized into the following groups:

i) **Own-account workers:** The self-employed persons, who operate their enterprises on their own account or with one or a few partners and who during the reference period by and large, run their enterprises without hiring any labour. They may, however, have unpaid helpers to assist them in the activity of the enterprise.

ii) **Home based workers:** Home based workers are those who are engaged in the production of goods or services for an employer or contractor in an arrangement whereby the work is carried out at the place of the workers own choice, often the workers own home. More precisely “the term “homework” means

work carried out by a person, to be referred to as a home worker:-

(i) in his or her home or in other premises of his or her choice other than the workplace of the employer;

(ii) for remuneration;

(iii) which results in production of goods and/or services as specified by the employer, irrespective of who provides the equipment, materials or other inputs used

Home-based workers are all those who carry out market work at home or in adjacent grounds or premises and these can further classified into two categories i) Self-employed home based workers and ii) Worked as paid workers.

a) **Own Account Home-Based Workers:** These are own-account workers and family workers helping the own-account workers involved in the production of goods and services, in their homes, for the market.

b) **Home based workers as paid workers:** These consist of workers carrying out work in

their homes for remuneration, resulting in a product or service as specified by the employer(s), irrespective of who provides the equipment, materials or other inputs used.

iii) **Employers:** The self-employed persons who work on their own account or with one or a few partners and by and large run their enterprises by hiring labour are considered as the employers.

iii) **Helpers in household enterprise:** The helpers are a category of self-employed persons, mostly family members, who keep themselves engaged in their household enterprises, working full or part time and do not receive any regular salary or wages in return for the work performed. They do not run the household enterprise on their own but assist the related person living in the same household in running the household enterprise.

2.20 Regular salaried/wage employee: Persons working in others farm or non-farm enterprises (both household and non-household) and getting in

return salary or wages on a regular basis (and not on the basis of daily or periodic renewal of work contract) are the regular salaried/wage employees. The category not only includes persons getting time wage but also persons receiving piece wage or salary and paid apprentices, both full time and part-time.

2.21 Worked on contract basis: The system of employing contract labour is prevalent in most industries in different occupations including skilled and semi skilled ones. It is also prevalent in agricultural and allied operations and to some extent in the services sector. A workman is deemed to be employed as Contract Labour when he is hired in connection with the work of an establishment by or through a contractor. Contract workmen are indirect employees; persons who are hired, supervised and remunerated by a contractor who, in turn, is compensated by the establishment. Contract labour has to be employed for work which is specific and for definite duration. Inferior labour status, casual nature of employment, lack of job security and poor economic conditions

are the major characteristics of contract labour.

2.22 Casual wage labour: A person casually engaged in others farm or non-farm enterprises (both household and non-household) and getting in return wage according to the terms of the daily or periodic work contract is a casual wage labour. Usually in the rural areas, a type of casual labourers can be seen who normally engage themselves in 'public works' activities. 'Public works' are those activities which are sponsored by the Government or local bodies for construction of roads, bunds, digging of ponds, etc. as relief measures (like flood relief, drought relief, famine relief, etc.) and also under various employment generation schemes under poverty alleviation programmes.

2.23 Different approaches for determining activity status: The persons surveyed can be classified into various activity categories on the basis of activities pursued by them during certain specified reference periods. There could be three reference periods viz. (i) one year, (ii) one week and (iii) each day of the reference week. Based on these three reference

periods, three different measures of activity status are arrived at. These are termed respectively as usual principal status, current weekly status and current daily status. The activity status determined on the basis of a reference period of one year is known as the usual principal activity status of the person, that determined on the basis of a reference period of 1 week is known as the current weekly status (CWS) of the person and the activity status determined on the basis of a reference period of one day is known as the current daily status (CDS) of the person.

2.24 Identification of each individual into a unique situation poses a problem when more than one of the three types of broad activity statuses viz. employed, unemployed and not in labour force is concurrently obtained for a person. In such an eventuality, unique identification under any one of the three broad activity statuses is done by adopting either the major time criterion or priority criterion. The former is used for classification of persons under usual activity status and the latter for classification of persons under current activity status.

2.25 Usual activity status: The usual activity status relates to the activity status of a person during the last completed twelve months from the date of survey. The activity in which a person spent relatively longer time (major time criterion) during the reference period is considered as the usual principal activity of the person. To decide the usual principal activity of a person, he/she is first categorized as belonging to the labour force or not, during the reference period on the basis of major time criterion. Persons, thus adjudged as not belonging to the labour force are assigned the broad activity status 'neither working nor available for work'. For the persons belonging to the labour force, the broad activity status of either 'working' or 'not working but available for work and/or seeking work' is then ascertained again on the basis of the relatively longer time spent during the period being in the labour force. Within the broad activity status so determined, the detailed activity status category of a person pursuing more than one such activity will be determined again on the basis of the relatively longer time spent.

2.26 Subsidiary economic activity status:

A person whose principal usual status is determined on the basis of the major time criterion may have pursued some other economic activity for 30 days or more during the reference period. The status in which such economic activity is pursued during the reference period is the subsidiary economic activity status of the person. In case of multiple subsidiary economic activities, subsidiary activity will be determined on the basis of relatively longer time spent criterion. It may be noted that engagement in work in subsidiary capacity may arise in the following two situations:

- i. a person may be engaged for a relatively longer period during the reference period in an economic or non-economic activity in the principal status and for a relatively minor period which is not less than 30 days, in another economic activity (any economic activity).
- ii. a person may be pursuing an economic activity or non-economic activity almost throughout the year in the principal status and also simultaneously pursuing another economic activity (any economic activity) for

relatively shorter time in a subsidiary capacity. In such cases, since both the activities are being pursued throughout the year and hence the duration in each activity is more than 30 days, the activity which is being pursued for a relatively shorter time will be considered as his/her subsidiary activity.

2.27 Current weekly activity

status: The current weekly activity status of a person is the activity status obtaining for a person during a reference period of seven days preceding the date of survey. It is decided on the basis of a certain priority cum major time criterion. According to the priority criterion, the status of 'working' gets priority over the status of 'not working but seeking or available for work', which in turn gets priority over the status of 'neither working nor available for work'. A person is considered working (or employed) if he/she, while pursuing any economic activity, had worked for at least one hour on at least one day during the seven days preceding the date of survey. A person is considered 'seeking or available for work (or unemployed)' if during the reference week no economic activity was pursued by the

person but he/she made efforts to get work or had been available for work for at least one hour any time during the reference week though not actively seeking work in the belief that no work was available. A person who had neither worked nor was available for work any time during the reference week is considered to be engaged in non-economic activities (or not in labour force). Having decided the broad current weekly activity status of a person on the basis of 'priority' criterion, the detailed current weekly activity status is again decided on the basis of 'major time' criterion if a person is pursuing multiple economic activities.

2.28 Current daily activity

status: The activity pattern of the population, particularly in the unorganized sector is such that during a week and sometimes even during a day, a person can pursue more than one activity. Moreover, many people can even undertake both economic and non-economic activities on the same day of a reference week. The current daily activity status for a person is determined on the basis of his/her activity status on each day of the reference week using a priority-cum-major time

criterion (day to day labour time disposition). The following points are noted for determining the current daily status of a person:

- I. Each day of the reference week is looked upon as comprising of either two 'half days' or a 'full day' for assigning the activity status.
- II. A person is considered 'working' (employed) for the entire day if he/she had worked for 4 hours or more during the day.
- III. If a person was engaged in more than one of the economic activities for 4 hours or more on a day, he/she would be assigned two economic activities out of the different economic activities on which he/she devoted relatively longer time on the reference day. In such cases, one 'half day' work will be considered for each of those two economic activities (i.e. 0.5 intensity will be assigned to each of these two economic activities).
- IV. If the person had worked for 1 hour or more but less than 4 hours, he/she is considered 'working' (employed) for half-day and 'seeking or available for work' (unemployed) or 'neither seeking nor available for work' (not in labour force) for the other half of the day depending on whether he was seeking/available for work or not.
- V. If a person was not engaged in 'work' even for 1 hour on a day but was seeking/available for work even for 4 hours or more, he/she is considered 'unemployed' for the entire day. But if he/she was 'seeking/available for work' for more than 1 hour and less than 4 hours only, he/she is considered 'unemployed' for half day and 'not in labour force' for the other half of the day.
- VI. A person who neither had any 'work' to do nor was available for 'work' even for half a day was considered 'not in labour force' for the entire day and is assigned one or two of the detailed non-economic activity status depending upon the activities pursued by him/her during the reference day.

Description of NIC 2008 Sections

Section	Description	
Section A	Agriculture, forestry and fishing	Code 1
Section B	Mining and quarrying	Code 2
Section C	Manufacturing	Code 3
Section D	Electricity, gas, steam and air conditioning supply	Code 4
Section E	Water supply; sewerage, waste management and remediation activities	Code 4
Section F	Construction	Code 5
Section G	Wholesale and retail trade; repair of motor vehicles and motorcycles	Code 6
Section H	Transportation and storage	Code 6
Section I	Accommodation and Food service activities	Code 6
Section J	Information and communication	Code 6
Section K	Financial and insurance activities	Code 7
Section L	Real estate activities	Code 7
Section M	Professional, scientific and technical activities	Code 7
Section N	Administrative and support service activities	Code 7
Section O	Public administration and defence; compulsory social security	Code 8
Section P	Education	Code 8
Section Q	Human health and social work activities	Code 8
Section R	Arts, entertainment and recreation	Code 8
Section S	Other service activities	Code 8
Section T	Activities of households as employers; undifferentiated goods and services producing activities of households for own use	Code 9
Section U	Activities of extraterritorial organizations and bodies	Code 9
